Summary of Return to School Plan Survey

June 2021

After reading this plan, do you have any suggestions or additions you would like the school district to change or add to it?

Comments Provided

None

No concerns

If the staff do not have to wear masks, I don't feel that the children should have to either. They are less susceptible to getting covid as bad to start with. I think it truly interferes with their learning. Honestly the younger children's masks are horrible at the end of the day and they are breathing in all that junk! I have daycare kids and see what their masks look like at the end of a day. The insides are covered with dirt, food, and are usually very moist—a heyday for molds and other things.

None. Glad we are getting back to normal

none

MASKING CHILDREN changes for the new school year.

My concern is having in person learning while the Delta variant surges the nation, review the current cases & forecast model for MN.

No

none

Let parents choose whether to mask their kids or not.

I suggest to do distant learning the first couple/few weeks of the school year (then determine how to move forward) given the timing of the MN state fair (no mandates) and the Lyon Co fair (no mandates). All of these events as schools are starting is concerning. I understand the "honest policy" but that has not gotten us (as a whole) where we need to be. I think this could alleviate some pressure on the divide of masks/no masks before having more guidance from the CDC / Gov't

my children are no longer practicing any social distancing or wearing masks in public places so I'm am comfortable with them returning to school without masks but encouraging hand hygiene as always for the spread of all infections.
