

SELLING, ADVERTISING AND FUND SOLICITATION (FUND RAISING)

Selling and advertising in the community by school groups or school booster groups shall be regulated so as not to interfere with other educational experiences or the operation of the schools. This policy is meant to provide guidelines for such activities.

Careful planning should be used to minimize nuisance in the community. The schools or groups shall avoid undue interference or competition with local commercial businesses. (Keeping in mind the goals of obtaining the best quality and price for items and services)

The administration and Board of Education will regularly review fund raising activities to determine if general budget funds should be allocated to meet the needs that lead to fund raising.
