

Common symptoms of COVID in Children and Teens

Symptoms may appear 2-14 days after exposure to someone testing positive.

The “Delta Variant” is more contagious and presents like the common cold.

People with these symptoms may have COVID:

- Headache
- Sore Throat
- Fatigue or tired
- Body aches
- Stomach pain – nausea, vomiting and/or diarrhea
- Cough
- Nasal symptoms – stuffy/ stopped up nose or runny nose
- Dizziness
- Possible Fever of 100.0 or higher
- Shortness of Breath or Trouble Breathing
- New loss of taste or smell

If you are having any of these symptoms: Please quarantine and notify your doctor to see if it is a cold or allergies OR COVID.

Let's try to keep all of us safe and WEAR YOUR MASKS!!
