

Art Blizzard Bags Days 1-3

Dear Family/Student,

Please see attached work for 3 days. Each day has a different picture. There is a hot air balloon, egg, and a puzzle template for the students to decorate. We have been working on learning about the different elements/principles of design. Some that we have talked about are lines, shapes, colors, texture, value, and patterns. I encouraged the students to use a combination of these elements in their designs. Also, the students can use any of the materials they have at home (crayons, pencils, paint, etc.) to decorate these spaces. Just a reminder that the students can create value by pressing down harder or lighter with their crayon for example to create light and dark areas. The students do not have to include texture in their work, but we have practiced this in class so if they have a material at home they can put under an area on their color sheet and then rub over that area with their crayon for example they will be able to create texture.

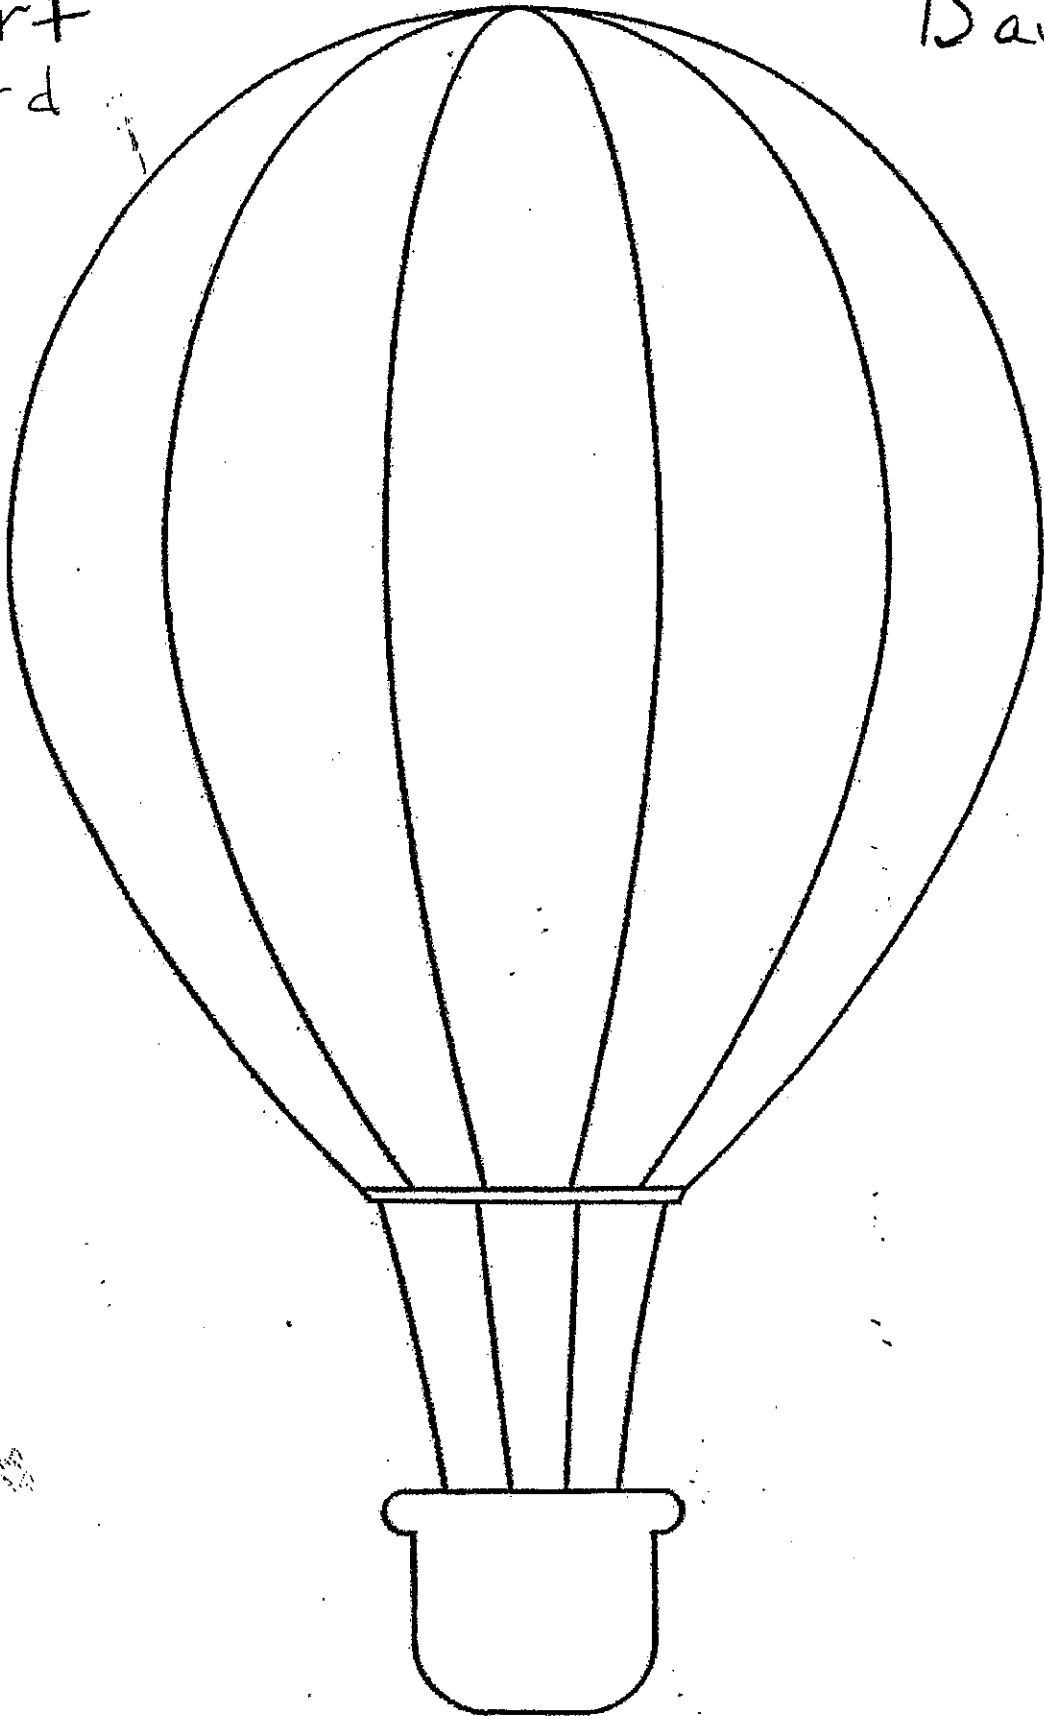

Most of all, I hope they have fun decorating the different pages. The students are so creative and I always look forward to seeing their ideas come alive in their work. Thank you students/families in advance for all that you do at home and take care! I will look forward to seeing my students when they come back.

Sincerely,

Mrs. Downey
