

Extended eLearning: eLearning that is planned to last more than two consecutive school days

- Assignments or instructions for the day will be posted by at least 9am in Google Classroom or in the student's email.
- Teachers may offer virtual class meetings during their regular class time. These Google Meet, Zoom, etc. sessions are highly recommended but not required for attendance purposes.
- Students will have at least two days to complete any assignment after the date it is assigned.
 - Example: If an assignment is posted on Monday, the earliest it will be due is Wednesday.
- Once a student misses the deadline to turn in an assignment, the student will be marked absent for the date the assignment was assigned.
 - Families should communicate in advance with teachers if they feel they will not be able to get an assignment done within the time frame assigned by the teacher due to Internet issues.
