

MAINE SCHOOL ADMINISTRATIVE DISTRICT #44
SUPERINTENDENT OF SCHOOLS
ONE PARKWAY ROAD, SUITE 204
BETHEL, ME, 04217

September 22, 2021

Dear Parent, Guardian, or Staff Member,

Three subjects that can affect children's health in school are: pests, pesticides and your right to know.

Pest Control

Because pesticides pose risks, the school uses an alternative approach to merely applying pesticides. Control of insects, rodents, and weeds at our school focuses on making the school buildings and grounds an unfavorable place for pests to live and breed. Through maintenance and cleaning, we will reduce or eliminate available food and water sources and hiding places for the pests. We will also routinely monitor the school area to detect pest problems and prevent the pests from becoming established. Some techniques we will use include pest monitoring, sanitation, pest exclusion, proper food storage, pest removal and—as a last resort—pesticides. This holistic approach is often called Integrated Pest Management (IPM).

Pesticide Use

Sometimes pesticide use may be necessary to control a pest problem. When that happens, the school will use the lowest risk products available. If higher risk pesticides must be used, notices will be posted at application sites. Parents, guardians and staff have a right to know.

Your Right to Know

Parents, legal guardians, and school staff will be notified of specific pesticide applications made at the school. **To receive notification, you must be placed on the notification registry by completing the application on the back of this sheet.** Notification will be given at least five days before planned pesticide applications. Pesticide application notices will also be posted in school and on school grounds. Notification need not be given for pesticide applications recognized by law to pose little or no risk of exposure to children or staff.

The school also keeps records of prior pesticide applications and information about the pesticides used. You may review these records, a copy of the School's Integrated Pest Management Policy and the Pesticides in School regulation (CMR 01-026 Chapter 27) by contacting our IPM coordinator, Ron Deegan, at 824-2471.

For further information about pests, pesticides and your right to know, call the Board of Pesticides Control at 207-287-2731 or visit the Maine School IPM web site at www.thinkfirstspraylast.org/schoolipm.

Sincerely,

David W. Murphy
Superintendent

NOTIFICATION FOR SPECIFIC PESTICIDE APPLICATION

I am a parent, legal guardian or staff member of (check all that apply)
__AES__CPS__WES__ TMS/THS school and I want to be notified
before specific pesticide applications are made at the school or on the
school grounds except the following: 1) non-volatile liquids injected into cracks,
crevices or wall voids; 2) non-volatile baits, gels, pastes and granular materials placed in
areas inaccessible to students; 3) paints, stains and wood preservatives; 4) disinfectants
used for routine cleaning; 5) non-powered applications of ready-to-use general use
pesticides to control or repel stinging or biting insects where there is an urgent need to
protect the health or safety of a student, staff member or other school occupant; 6) when
school is not in session and will not be in session until the re-entry time specified on the
pesticide label has elapsed and 7) indoor applications of a pesticide with no re-entry
interval specified on its label but entry to the treated area is restricted for at least 24
hours.
