Background

The Edgenuity program is a personalized online learning program for reading and mathematics. The MyPath K-12 Intervention and Enrichment is a supplemental program for Reading and Mathematics that offers enrichment and intervention. It utilizes the Smart Sequencer technology to assess student skill level using the proficiency data to create an Individual Learning Plan (ILP) tailored towards the individual needs of each student. It has a built-in adaptive assessment that will measure each student's skill level and match it to the appropriate instructional grade level.

This program enables teachers to:

- Assess using the standard built-in measure of a student's instructional grade level and their ability level.
- Assign lessons based on the Individual Learning Plan.

- **Adapt lessons based on the student's ability level and their actual grade level.**
- **Analyze the data in real-time related to student engagement, progress, and achievement.**
- **Be notified when students are struggling with a lesson and provide downloadable resources to support the students in small group instruction.**

The Edgenuity Courseware 9-12 is a personalized online learning program that offers rigorous English Language Arts, Mathematics, Science and Social Studies, World Language, Career Technology Education (CTE), and elective instruction that is aligned to the New Jersey Student Learning Standards (NJSLA), the national standards, and the Next Generation Science Standards. It enables teachers to ensure concept mastery and identify learning gaps.

All courses combine direct instruction videos featuring expert on-screen teachers with rigorous assignments, performance tasks, and assessments to engage students in subject area mastery. The courseware offers supplemental instruction that can be offered for in-person instruction, hybrid instruction, and full virtual instruction.
