

Immunization Requirements for Grades K-12

- Medical records must be **certified** and **translated** by a US doctor if needed at time of registration.
- DTaP – Kindergarten and 1st grade - 4 doses with one given on or after the 4th birthday or any five doses
 - 2nd grade (7 years old) and higher - 3 doses
- Tdap – 1 dose is required for students born after 1/1/97 entering 6th grade and higher who are 11 years of age or older
- Polio – Kindergarten and 1st grade - 3 doses with one given on or after the 4th birthday or any four doses
 - 2nd grade (7 years old) and higher - 3 doses
- Measles - 2 doses of a measles containing vaccine with the first dose given on or after the 1st birthday. Intervals between the first and second doses cannot be less than 1 month. Laboratory evidence of immunity in lieu of the second dose is acceptable.
- Mumps-Rubella vaccines - 1 dose of each given on or after the 1st birthday required.
- Varicella (chicken pox) vaccine– 1 dose given on or after the 1st birthday. Children, who present documented laboratory evidence, a physician's statement, or parental statement of previous Varicella disease, shall not be required to receive the Varicella vaccine.
- Hepatitis B vaccine - 3 appropriately spaced doses
- Meningococcal conjugate vaccine – 1 dose is required for students born after 1/1/97 entering 6th grade and higher who are 11 years of age or older
- Mantoux Tuberculin Test - may be required depending on country of birth.
- Your child is required to have a physical examination upon entry into the school district. This exam must have been conducted no more than 365 days prior to entry.
