ASBESTOS INSPECTION AND MANAGEMENT PLAN NOTICE

In order to comply with the requirements of the Asbestos Hazard Emergency Response Act of 1987, the Board of Education employed an asbestos firm to conduct a complete survey every 3 years of all school facilities. This survey includes visual inspections and samples from each area of all school sites. (All inspectors were certified and licensed by the Oklahoma State Department of Labor.)

As a result of the inspection, management plans were written for each site, and are located at the Superintendent's Office. All maintenance and custodial staff receive asbestos awareness training, in compliance with the act, and yearly inspections are conducted in a timely manner.

In accordance with the Asbestos Hazard Emergency Response Act of 1987, the inspection and management plan are completed, updated and available in the Superintendent's Office at 6520 E. Wood Rd., Waukomis 73773. Any parties with an interest in the plans or implementation will be notified of steps taken to eliminate any asbestos containing materials, which may be harmful to individuals at school sites.
