Student Opportunities for
Learning & Engagement

SUMMER 2023

PROJECT LEAD THE WAY

PROGRAM DETAILS

Students will participate in Project Lead the Way (PLTW) Gateway Modules and English Language Arts and Math Lessons customized to their skill development needs. In addition, students will have time during lunch for outside physical activity and games. Students will complete one PLTW module per camp session. PLTW modules for summer programming include:

FLIGHT & SPACE

The exciting world of aerospace comes alive through the Flight and Space (FS) unit. Students become engineers as they design, prototype, and test models to learn about the science of flight and what it takes to travel and live in space. They solve real-world aviation and space challenges and plan a mission to Mars.

ENERGY & THE ENVIRONMENT

Students are challenged to think big and toward the future as they explore sustainable solutions to our energy needs and investigate the impact of energy on our lives and the world. They use what they've learned to design and model alternative energy sources, as well as evaluate options for reducing energy consumption.

MEDICAL DETECTIVES

Students play the role of real-life medical detectives as they collect and analyze medical data to diagnose disease(s). Students solve medical mysteries through hands-on projects and labs, measure and interpret vital signs, examine nervous system structure and function, and investigate disease outbreaks.

Putnam County Schools (PCS) 2023 Summer Student Opportunities for Learning and Engagement (SOLE) programs are available for middle school students entering grades 6, 7, & 8 and exiting grade 8.

All students must currently be enrolled in a PCS public school.

Students can register in one camp session or both!
