

**OLD BRIDGE TOWNSHIP BOARD OF EDUCATION
DEPARTMENT OF PLANT SERVICES**

To: Christopher McCue
M. Scott Carpenter Elementary School

From: Ernest Tricomi
Director of Plant Services

Subject: Annual Public Notification of
Asbestos Inspection Reports

Date: September 22, 2022

As we begin a new school year, every Principal is required to notify all building staff and students of the existing district wide Asbestos Management Plan that is in place.

A hard copy of the attached notification needs to be distributed to all staff and students as soon as possible once the school year begins.

A copy of this notification should be filed in your white A.H.E.R.A. binder as well.

Please return a copy of this letter, signed, to my office indicating that you have distributed this notification to all staff and students.

Thank you in advance for your time and assistance. Please feel free to contact the Plant Services Department if you have any questions.

ANNUAL NOTIFICATION – ASBESTOS INSPECTION REPORTS

Dear Parents and Staff,

Per the United States Environmental Protection Agency's (USEPA), "Asbestos Hazard Emergency Response Act" (AHERA), 40 CFR 763.93, inspections for the presence of asbestos containing building materials has been completed, and an Asbestos Management Plan developed for all district properties.

In compliance with the United States Environmental Protection Agency (USEPA), periodic physical surveillance of asbestos containing materials will be performed every six months. The law also requires re-inspections of all asbestos containing materials, of all district properties, be performed every three years.

The results of the periodic surveillance and re-inspections are on file in the main office of all district schools.

In July 2022, a required periodic surveillance was performed. The result of this inspection confirmed that these materials do not pose any immediate threat or health risk in the foreseeable future, as long as, they continue to be properly maintained.

Removal and repair to asbestos containing materials were performed at the following schools: Old Bridge High School, Salk Middle School, Glenn Pre-School, Cooper Elementary School, Schirra Elementary School and Madison Park Elementary School during the 2021-2022 school year.

Should you have any questions or require additional information, please contact Ernest Tricomi, Director of Plant Services at 732-360-4507.
