ESSER Funded Construction.

# Description:

Due to antiquated equipment in various states of disrepair and/or original design flaws of equipment, we did not meet current ASHRAE guidelines for fresh air supply or proper air changes per hour. We will accomplish our goal of meeting or exceeding the ASHRAE guidelines by replacing antiquated equipment and/or redesigning the current HVAC equipment. A great deal of the updating of the HVAC has been funded by CARES ESSER I & CRRSA ESSER II & SPCRF, but remaining HVAC and other facilities work deemed as necessary will be funded by ARP ESSER III, if they are available. Correct lack of Fresh air supply in both locker rooms. This will be accomplished by installing an ERV (Energy Recovery Units) complete with reheat coil, and incorporated into the building automation system in each locker room. When this project is completed both rooms will meet or exceed all ASHRAE Air Quality Standards. \$60,000. Replace failing HVAC controls in the main office, library, and music room. The current controls are failing to provide reliable fresh air to these spaces. New controls will ensure the fresh air supply will meet or exceed all ASHREA standards. \$40,000. Replace 4 air handlers that are failing in the Elementary building. This will be accomplished by installing ERV's (Energy Recovery Units) complete with reheat coils, and incorporated into the building automation system. When this project is completed these instructional spaces will meet or exceed all ASHRAE Air Quality Standards. \$105,000.
