

# Republic Services Scholarship Program

---

*Republic Services and the City of San Angelo partner to offer scholarships to students with academic excellence whom are environmentally minded:*

Continuing education, training and learning are the cornerstone of our ability to compete in the global marketplace. A well-educated and experienced workforce will restore economic development and job creation. Republic Services understands that providing opportunities to achieve academic success, personal growth and training in vocational education will sustain a future of economic and intellectual growth.

The goal of the program is to provide scholarship opportunities for students interested in pursuing both a traditional four-year university/college degree as well as advanced certification in a trade or vocational program.

Republic Services will award 10\* (\$1,000) scholarships to eligible graduating seniors from the class of 2023 to continue to pursue their educational objectives.

The 2023 scholarship winners will be required to present a written essay of 500 words or less describing how they believe today's environment can be preserved and protected for future generations.

Students will be challenged to answer one of the following questions:

- **What steps can you take in your everyday life to enhance and maintain the environment and improve sustainability in San Angelo?**
- **What current technology and green-living practices do you and your family use today that helps improve the environment and what impacts do you think this makes on the environment?**
- **What future technical advancements can you imagine for solving current environmental and sustainability challenges in San Angelo?**

Essays are due **Sunday, April 30, 2023** to the following E-mail.
