

Wahluke Parents Make the Difference!

OUTCOME OVERVIEW

- ★ 10th Grade **NEVER USED ALCOHOL**
Outcome is a **35.5% Increase**, a positive change
- ★ 10th Grade **Past 30 day Use ALCOHOL**
Outcome is a **20.1% Decrease**, a positive change.

Baseline data from the Healthy Youth Survey 2010 indicated only 38% of the 10th graders had never drunk alcohol and 27% had 30 past use. Our 2021 Covid Student Survey that asked the same questions indicated that 73.5% reported NEVER drinking alcohol and only 6.9% reporting past 30 day use. These two data points showcase a huge outcome achieved in reducing alcohol use and demonstrating a positive change in our community.

Youth Alcohol Use is DOWN!

Wahluke Parents are talking to their kids about abstinence, monitoring their teens whereabouts, and reducing youth access to alcohol in their homes at celebrations and at family parties.
