Dental Program Permission Slip

Teeth-For-Life is offering a preventive dental program for ALL children in PreK-6th grade. This program is funded by the Wisconsin Seal-A-Smile, a collaborative program of Children's Health Alliance of Wisconsin and the Wisconsin Division of Public Health Oral Health Program. A dental provider will come to the school to provide the program at no charge to you. The program includes: dental cleaning assessment to determine if sealants can be done, sealants if appropriate, a fluoride varnish treatment and oral health education with a new toothbrush. A follow-up letter will be sent home to describe what was completed and what is recommended for future needs. All procedures will follow recommendations from the American Dental Association and Centers for Disease Control and Prevention's recommendations for school-based dental sealant programs. This permission is effective for two years in order to provide six month cleanings and sealant replacements if necessary.

If yes what type?				=
9. Has your child been seen by a dent	st? YES, within one yea	rYES, ove	er one year ag	Jo
	NEVER			

^{**}The treatment which your child will receive in this program is not meant to be an alternative to regular dental care. It is still strongly recommended that you seek out a dental home (family dentist) for routine dental care including any follow up care which may be recommended after your child has completed this school based oral health program.
