

Expanding choices and opportunities

Pearson Connexus™ offers over 700 proven, standards-aligned K-12 courses* for a variety of levels, pathways, and instructional strategies. Select from our wide range of content to make the most of your available resources and meet the needs of every learner right where they are.

Academic Courses

In teacher-supported courses, educators differentiate instruction, modifying assignments and assessment for each learner. Students receive system- and teacher-generated feedback to help them master content before moving on.

This level also includes student-driven courses that foster self-paced, independent learning with system-generated feedback.

Foundation Courses

Foundation courses deliver the same great instruction as our academic courses, but take greater time to focus on core concepts, differentiate assignments, and provide additional practice and review for better student understanding.

Honors & AP Courses

Honors courses provide students with advanced, rigorous assignments for enrichment and honors credits. Teachers engage students in discussion, facilitate exploratory projects, and provide feedback on assignments.

AP® courses include college-level work to help students prepare for the Advanced Placement exam and earn college credit, all the while supporting teachers in online course delivery.

Credit Recovery Courses

Improve graduation rates with credit recovery courses that deliver essential content to address standards and reinforce student persistence. Lesson pacing is prescribed based on a student's pre-test results to keep the learner engaged, and these courses require little to no teacher grading.
