

# Yale Alternative Education Goals and Objectives

2021-2022

---

Yale Alternative School goals are to provide appropriate opportunities for students which are at risk of failure in a traditional school setting. Our objective is to allow identified at risk students to become academically successful through a variety of educational interventions and alternative methods.

Yale alternative education objectives should include helping students:

- Experience a safe educational environment.
- Give students the opportunity to be successful through flexibility, guidance, academic modifications, behavioral interventions, remediation, and career exploration.
- Make academic progress.
- Achieve a High School Diploma.
- Prepare for transitions to the world of work, academia, or military service.
- Develop an awareness of civic responsibility.
- Obtain life-long skills of self-management and responsibility.
- Foster feelings of self-worth, self-confidence, and personal satisfaction.

Yale Schools aims to provide a competency-based, self-paced program with clear, quantifiable objectives. Instruction will be provided in a variety of ways, best suited to the individual student's needs, in order to help ensure student success.

Our goal is to help students attain both intellectual growth and personal development while achieving their educational objectives. Yale Alternative Education program will provide opportunities through personalized academic instruction, vocational programs, work-study programs, and facilitate outside agencies to foster growth and accomplishment in our students. We encourage students, parents, teachers, and administrators to work together to help students reach their potential.
