## YOU'RE INVITED!

Please join Centerstone's Prevention Team in a 45 minute discussion on important, but sometimes difficult, topics and how to talk about them with teens.

These workshops will equip parents & caregivers with the necessary material to engage meaningful conversations, they provide helpful resources, and will offer strategies that help overcome barriers between adults and teens.

*This project is funded by grant # TPIAH000252 from the HHS Office of Population Affairs.*
