November 2021: COVID UPDATES

Currently, the Geneva School Nurses are following the Ohio Department of Health and the Ashtabula County Health Department guidelines for isolation and quarantine related to Covid positive cases. We are also following school guidelines related to general illness. This applies to both students and staff members.

See the bottom three links for further information. **In addition, here are some of the guidelines provided to us by the Ashtabula County Health Department.** Please realize that each individual case is unique and may need evaluation by the school nurses and the health department to determine the isolation/quarantine periods. These guidelines are subject to changes and updates at any time. If you have any questions, please contact a school nurse or the Ashtabula County Health Department Epidemiologist, Allie Peterson, at 440-576-6010 ext. 112.

Per ACHD: "If the student or staff member is exposed outside of school and IS fully vaccinated against Covid, he/she may return to school masked for 2 weeks."

Per ACHD: "If the student or staff member is exposed outside of school and is NOT vaccinated against Covid, he/she must be quarantined for 2 weeks."

Per ACHD: "A person who has a documented positive Covid test (completed by medical professional, proctored home test, or called in to report home test) within the past 90 days, is treated as if they are vaccinated. No quarantine is necessary and they must wear a mask for 2 weeks."

Per ODH & ACHD: If the student or staff member is exposed inside of school, follow the Mask to Stay/Test to Play guidelines. Link located below.

Lastly, if you have possible Covid symptoms, please stay home and notify the school nurse.
