#### Q How do I use Paytient?

For the best experience, download the Paytient app and you have access to a \$1,000 line of credit. You are able to use as much or as little of this money as you wish by using the virtual VISA payment card within the app to pay for medical, dental, vision, or vet care. Simply show your phone at the checkout and then select the number of paychecks to split it up into for repayment. Interest-free.

#### Q Where can I use Paytient?

At any medical, dental, vision or veterinary healthcare facility that accepts VISA. For convenience, we will soon have a list of doctors in the app that would like to see more "Paytients" in their practice.

#### Q Why should I use Paytient?

For many Americans, a surprise \$400 expense can be financially stressful. Your employer is working with Paytient to help improve the affordability of out-of-pocket medical, dental, vision, or vet bills.

#### Q Does this affect my HSA or Health Insurance?

No. Paytient is completely unrelated. We are simply the most financially friendly way to pay out-of-pocket expenses over time.

#### Q Who decides the payment plan?

You do. After the health care facility runs your virtual card, you decide how many paychecks to split that transaction up into.
