### **1:9 Trade Names and Materials**

- a) Where materials or equipment are specified by a trade or brand name, it is not the intention of the NPSB to discriminate against an equal product of another manufacturer.
- b) It is to be understood that the use of such a brand name or trade name is to define a standard of quality, character, and performance as well as establish an equal basis for the evaluation of bids.

- d) It shall be the responsibility of the Supervisor of Purchasing to determine what is considered an equivalent product.

- a) The NPSB reserves the right to reject, in whole or in part, any and all bids and to waive any and all technicalities and informalities, and reissue an Invitation to Bid in accordance with the state law.
- b) The NPSB reserves the right to negotiate with the lowest responsive, responsible bidder prior to bid award and to issue change orders in conjunction with bid award.
- c) Bids shall be opened publicly, read aloud, recorded, and compiled in a tabular form, a copy of which will be available for examination in the Purchasing Department. No determination of bid award will be made at the time of opening. After review by the Purchasing Department, the certified tabulation and recommendation for bid award will be available for examination prior to the official meeting for consideration by the Board. Recommendation of award will be made to the NPSB based upon the lowest responsible and responsive bidder(s) in conformance with the criteria designated in the Invitation to Bid.
- d) For the purpose of making this evaluation, administrative costs the NPSB for issuing and administering each contract awarded under this invitation will be considered. Individual awards may be made for the items and combinations of items, which result in the lowest aggregate price to the NPSB, including such administrative costs. Based on such administrative costs the NPSB may make multiple awards for this contract.
- e) In calculation of the lowest responsive bid, unit prices shall supersede extended prices for items bid in quantity, and written expressions for a price shall supersede the corresponding numerical expression if they do not agree. A random unsubstantive discrepancy in extended prices will not render a bid unresponsive. The Purchasing Department shall read the bids as submitted, note any discrepancies, and request written clarification for insubstantive (minor) errors that do not affect low bid determination.
- f) The NPSB may reject any bid for failure by the bidder to comply with any requirement stated in the bid documents. Non-responsive bidders will be noted on the bid tabulation as such, with reason(s) for this determination stated.
- g) The NPSB reserves the right to reject all bids (individual line item or group, as applicable) if the lowest bid is in excess of ten percent (10%) of the price offered to any government entity by any authorized distributor for similar quantities of the same product within 180 days prior to bid opening.
- h) Any bidder evidenced to be not responsible may be disqualified through a Disqualification Hearing process, and if declared "not responsible" by the NPSB bids shall be rejected. A bidder may be declared not responsible for such reasons including, but not limited to, failure to pay taxes, failure to obtain licenses or permits, poor performance on past contracts with NPSB or other government agency, or lack of evident capacity to fulfill contract.
- i) The NPSB reserves the right to contact bidders for the purpose of obtaining additional information and/or clarification that will assure full understanding of, and responsiveness to, solicitation requirements. Such information shall be

provided within five business days. This may include brochures, specification sheets, detail drawings, or samples.

- j) The NPSB reserves the right to eliminate any and all items from the bid list prior to issuing a bid award, a notice to proceed, or a purchase order, and if so, the bid price shall be adjusted accordingly.
- k) Payment discounts, while accepted, will not be used in the determination of low bid.
- l) Awards become official at the time bids are accepted by the NPSB during their regular sessions. Contact has its inception in the award, eliminating a formal signing of a separate Contract Document.
- m) The purchase order and/or contract mailed or delivered to the successful bidder is the official authorization to deliver materials or perform the services described therein. The time allowed for delivery or performance begins with the date of bid acceptance and approval by the NPSB unless otherwise specified in the bid documents whether or not a purchase order or contract has been issued.
- n) Preference
  - Preference is hereby given to materials, supplies and provisions, produced, manufactured or grown in Louisiana, quality being equal to articles offered by competitors outside of the state.
  - Preference for Louisiana products may be granted in accordance with LA R.S. 38:2251. Bidder shall include with bid, or submit in a separate envelope that meets the requirements of 1.5.2, a notarized statement indicating which bid items meet preference requirements.
  - For determination of preference, paper and paper products shall be manufactured or converted in Louisiana. For the purposes of this paragraph, "manufactured" shall mean the process of making a product suitable for use from raw materials by hand or by machinery and "converted" shall mean the process of converting roll stock into a sheeted and fully packaged product in a full-time converting operation. For paper supplied in wrapped reams, each carton and each individual ream shall be clearly labeled with the name of the manufacturer or converter and the location within Louisiana where such paper is manufactured or converted.
  - In the event of a tie bid, preference will be given in the following order: companies located in Natchitoches Parish, companies located in the State of Louisiana, companies whose Louisiana business workforce is comprised of a minimum of fifty percent Louisiana residents, and bid with earliest submittal time.

**Davis-Bacon Act**, as amended (40 U.S.C. 3141-3148). When required by Federal program legislation, all prime construction contracts in excess of \$2,000 awarded by non-Federal entities must include a provision for compliance with the Davis-Bacon Act (40 U.S.C. 3141-3144, and 3146-3148) as supplemented by Department of Labor regulations (29 CFR Part 5, "Labor Standards Provisions Applicable to Contracts Covering Federally Financed and Assisted Construction"). In accordance with the statute, contractors must pay wages to laborers and mechanics at a rate not less than the prevailing wages specified in a wage determination made by the Secretary of Labor. In addition, contractors must pay wages not less than once a week.

**Copeland "Anti-Kickback" Act** (40 U.S.C. 3145), as supplemented by Department of Labor regulations (29 CFR Part 3, "Contractors and Subcontractors on Public Building or Public Work Financed in Whole or in Part by Loans or Grants from the United States"). The Act provides that each contractor or sub-recipient must be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he or she is otherwise entitled. The non-Federal entity must report all suspected or reported violations to the Federal awarding agency.

**Contract Work Hours and Safety Standards Act** (40 U.S.C. 3701-3708). Where applicable, all contracts awarded by the non-Federal entity in excess of \$100,000 that

involve the employment of mechanics or laborers must include a provision for compliance with 40 U.S.C. 3702 and 3704, as supplemented by Department of Labor regulations (29 CFR Part 5). Under 40 U.S.C. 3702 of the Act, each contractor must be required to compute the wages of every mechanic and laborer on the basis of a standard work week of 40 hours. Work in excess of the standard work week is permissible provided that the worker is compensated at a rate of not less than one and a half times the basic rate of pay for all hours worked in excess of 40 hours in the work week. The requirements of 40 U.S.C. 3704 are applicable to construction work and provide that no laborer or mechanic must be required to work in surroundings or under working conditions which are unsanitary, hazardous or dangerous. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence Appendix II of 2 CFR Part 200(E).

**Rights to Inventions Made Under a Contract or Agreement.** If the Federal award meets the definition of "funding agreement" under 37 CFR §401.2 (a) and the recipient or sub-recipient wishes to enter into a contract with a small business firm or nonprofit organization regarding the substitution of parties, assignment or performance of experimental, developmental, or research work under that "funding agreement," the recipient or sub-recipient must comply with the requirements of 37 CFR Part 401, "Rights to Inventions Made by Nonprofit Organizations and Small Business Firms Under Government Grants, Contracts and Cooperative Agreements," and any implementing regulations issued by the awarding agency.

**Procurement of Recovered Materials-** A Non-Federal entity that is a state agency of a political subdivision of a state and its contractors must comply with section 6002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act. The requirements of Section 6002 include procuring only items designated in guidelines of the Environmental Protection Agency (EPA) at 40 CFR part 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition, where the purchase price of the item exceeds \$10,000 or the value of the quantity acquired by the preceding fiscal year exceeded \$10,000; procuring solid waste management services in a manner that maximizes energy and resource recovery; and establishing an affirmative procurement program for procurement of recovered materials identified in the EPA guidelines (2 CFR Part 200.322)

All bids are to include installation and removal of old equipment.

Removed equipment is to be re-located to the SFS Warehouse at 300 Parkway Drive.
