

ESSER III Funds

E-H will purchase promethean boards for classrooms. These boards will be used as teaching tools to help students with the loss of learning. The boards will allow students to space out in the classroom but still see interactive technology that is helping them learn materials that are needed for mastery.

High quality instructional materials will be purchased in the areas of math and Language arts. The high-quality core instructional materials will help students with loss of leaning and they will be tied to the Nebraska State Standards.

90% of the windows at the elementary building do not open. We will replace the windows so that they can be opened, and air circulation can take place in the classrooms. With air circulating we are hoping to reduce the spread of COVID.

E-H will purchase two expeditions and two busses to add to the current fleet. The purchase of these items will help us spread out students while transporting them helping reduce the spread of COVID.
