

## REQUEST FOR PROPOSALS - ELEMENTARY ENTRANCE

Iberia R-V is accepting proposals for the renovation and expansion of the front elementary entry. The current entry alcove will be extended and a new service window will be installed on a wall of the existing alcove. This request has been simplified to accommodate contractor creativity and experience, but all proposals will include any and all materials and work needed to make the repairs/installation functional, attractive, and compatible with existing structures or systems in use in the district.

1. The existing entry alcove is too small to accommodate the addition of a new service window. Additionally, the size of the current alcove will constrict/restrict movement out of the building in case of an emergency.
2. New walls and a new doorway will be constructed to extend the alcove area. Proposals should include the cost of the wall construction as well as the cost of a new doorway/door, and all associated costs, to include repairs or replacement of flooring.
3. The attached drawing shows approximate measurements for the addition. Minor modifications may be needed to accommodate the existing structures. Contractors are encouraged to make on-site visits to properly understand the scope of the project.
4. We are accepting proposals for both block construction and frame construction. Frame construction will require the use of impact-resistant drywall.
5. The new doors (60" combined) will be heavy-duty with panic bars for exit. Any hardware will integrate with the current keying system.
6. Only appropriately licensed, bonded, and insured contractors may be used on this project.
7. RFP's must be received in the Iberia R-V Central Office no later than 4 p.m. on Tuesday, June 26, 2018
8. Questions should be directed to Lyndel Whittle, Superintendent - 573-793-6818, [lyndelw@iberia.k12.mo.us](mailto:lyndelw@iberia.k12.mo.us)
