

REQUEST FOR PROPOSALS - SPEAKERS/INTERCOM

Iberia R-V is accepting proposals for improvements and additions to the existing intercom/speaker system. This request has been simplified to accommodate contractor creativity and experience, but all proposals will include any and all materials and work needed to make the repairs/installation functional, attractive, and compatible with existing structures or systems in use in the district.

1. Many of our existing speakers no longer function properly and need to be repaired or replaced. We are also considering the addition of speakers to insure messages reach throughout the facilities.
2. Current system - Intercom messages are broadcast through the Mitel phone system. There is a variety of existing speakers in classrooms and other locations in the facility. Some of these function well, others do not. Additionally, the elementary and high school operate under two different "networks" - each has it's own intercom code. We would like to investigate the integration of the two systems so one code can call the entire facility.
3. Any improvements or additions must be compatible with the existing system. We are not requesting proposals for a replacement system.
4. Only appropriately licensed, bonded, and insured contractors may be used on this project.
5. The attached drawing indicates areas of concern or areas in which additional speakers are desired. Contractors are encouraged to make on-site visits to properly understand the scope of the project.
6. RFP's must be received in the Iberia R-V Central Office no later than 4 p.m. on Tuesday, June 26, 2018.
7. Questions should be directed to Lyndel Whittle, Superintendent - 573-793-6818, lyndelw@iberia.k12.mo.us

Speakers

(Integrate HS & EL)

- Speakers Needed
- Cannot hear speakers
- Difficult to hear speaker
