

ANNUAL ASBESTOS NOTIFICATION

Federal regulations require that schools be inspected for the presence of asbestos, a toxic material that has been used by the construction industry for a number of years. All NACS buildings have been inspected for asbestos containing materials and the results of the inspection are contained in the Asbestos Management Plan. This plan has been sent to the State authority in charge of asbestos abatement.

The Asbestos Management Plan is available for review during regular working hours of the office of Facilities Director. A copy of the Asbestos Management Plan will be made for a nominal fee to cover the cost of copying and handling.

Recent scientific and medical evidence has shown that asbestos containing material can be harmful to the human body. The required six-month surveillance was done in all buildings on December 28, 2022. The next scheduled six-month surveillance will be in June 2023.

For more details regarding the Asbestos Management Plan, please contact the school LEA Designee, Daniel Scott, at (518) 594-3986 x2650.
