

Trust Relationship error

1. Some of our computers have been getting this error when signing in

2. We have a method that has been working to get the user back on the machine.

Step:

1. Disconnect the blue cat 5 network cable from the computer
2. Log on to the computer with the blue network cable disconnected.
3. Re-connect the network cable after you successfully log in.
4. This normally fixes the issue, If not you need to do a school dude.
5. If you provide the user name we can often reset the account to fix the issue.
