

# How Teachers can Allow YOU TUBE Videos

1. For these instructions to work you must be logged in on your District google account. And students have to also be logged into google to view your approved videos
2. Go to YouTube and find the video that is locked
3. Make sure you are signed into your district google account.
4. Click Approve button on YouTube. (See arrow)

5. This approves all users this video under your Login. Please verify the video is appropriate before approving. The video will show who approved it and when.

If the video is already approved it will say Watchable by slp.k12.la.us. This is a good way to verify a video will be available to your students or users.
