WELCOME TO SUMMER 2023 at Wichita Collegiate School

Are you looking for a place where your student will continue learning, make lasting friendships, and explore hidden talents? Then look no further! Our Summer Explorations program has more than 150 classes spread over seven weeks for every age, interest, ability, and schedule. Offerings include academic classes for credit and enrichment, sport clinics, team camps, classes in visual and performing arts, plus cooking, driver education, foreign language, LEGOs, science, technology, and much more! Our experienced Collegiate teachers, distinguished guest faculty, and expert coaches, artists, and musicians look forward to helping your student reach their goals and develop new passions this summer.

This catalog begins with Week at a Glance class listings divided by student age: Early Childhood, Lower School, Middle School, Upper School, and Adult. Following these listings, all classes are listed alphabetically with full course descriptions.

If you need more information or assistance, please call the Wichita Collegiate Summer Explorations office at **316-771-2289** or send an email to summerexplorations@wcsks.com.

I look forward to a wonderful summer together!

Junilda Farnar

Director, Summer Explorations 2023

PLEASE NOTE:

- * Enroll your students according to their grade level for the upcoming 2023-2024 academic year.
- * All additional registration forms and/or health forms must be returned prior to attending the first class. They can be found in your confirmation email and on the Summer Explorations webpage located at wcsks.com/page/summer-exploration.
- * Save 10% on your class fee when you refer a *new student to attend the same class. You must designate the referral when enrolling. After the class ends, the referring student will be reimbursed 10% as a thank you for bringing a friend! (*attending a Summer Explorations class for the first time)
- * Students attending both a morning and afternoon class must leave campus in between classes.

GENERAL INFORMATION

Summer Programs Dates and Times

Summer Explorations runs June 5 through July 28, 2022. Classes are available for all ages from preschool to adult. We provide Kids Club from 7:30 a.m. to 9:00 a.m. and from 3:00 p.m. until 5:30 p.m. for students attending full day classes only.

Lunch

Nutritious lunches prepared by SAGE Dining Services may be purchased by the week or for the entire summer. Students 1st Grade and older may bring a lunch from home; Early Childhood students may not. We provide a supervised lunch period from 11:30 a.m. to 12:30 p.m. ONLY for students attending our Camp Collegiate, Spartan Quest, and Young Explorers full day classes.

Fees

All fees are paid via our online registration system with a credit or debit card. Fees must be paid in advance of the class. When registering online you may choose to pay in full or elect the Payment Plan, which requires a 40% deposit with the remaining due on Wednesday the week before the first day of class. The registrant accepts that Wichita Collegiate School will automatically deduct any balance due for a class in the manner provided. Wichita Collegiate School reserves the right to automatically deduct any delinquent or outstanding balances without notification.

Online Registration and Parent Portal

Our system has two parts: the online registration platform and the parent portal. The online registration link will take you to that module for new course registration. The parent portal link will allow you to view your enrolled courses and financial account, as well as print statements and make payments. Both of these links are available on the Summer Explorations web page located at wcsks.com/page/summer-exploration.

Cancellations or Refunds

Payments will be refunded if any class is cancelled by Wichita Collegiate School at any time. If the class is NOT cancelled, a refund minus an administration fee for each course will be given if the request to withdraw is made by email prior to two weeks before the first day of class. The administration fee will be either \$25 or 5.5% of the class fee, whichever is greater.

Behavior Policy

Wichita Collegiate School reserves the right to request withdrawal of any student whose conduct, attendance, or progress is deemed undesirable or unsatisfactory. Failing to conform to the school's rules and regulations can cause immediate dismissal without refund. Possession or use of alcohol, tobacco, drugs, or firearms is prohibited.

Program Information

For additional information about Summer Explorations, call 316-771-2289 or email summerexplorations@wcsks.com. Information can be provided by each division office. For information concerning admissions for the academic school year, contact the Office of Enrollment at 316-771-2203.

3D Printing with Tinkercad

Joe Gehrer

Tinkercad is an easy-to-use 3D design program that can create a wide range of 3D printed items. Students will learn the basics of 3D design using Tinkercad, then send designs to the “slicer” program to make sure the print will turn out perfectly. The final step is learning how to run the 3D printer and watching the creations come to life! Potential 3D printed items include board game pieces, bubble wands, LEGO boats, and much more. Bring your imagination and let’s get printing!

6/12 - 6/16 9:00 AM - 11:30 AM Grades 4-12 \$230

ACT Prep for Critical Reading and Writing

Jillian King

Feed your body and mind! Get testing help and great snacks in a relaxed environment! Let’s be honest; no one associates summer vacation with standardized test prep. However, for those brave souls willing to accept the challenge, we will be having great breakfast snacks as well as coffee, cocoa, and juice to ease into the morning. Our class will focus primarily on two areas: test-taking strategies to assist on the multiple-choice sections and writing strategies and individual analysis to assist on timed essays. Students planning to take the ACT on June 10 could certainly benefit from this course.

Email jking@wcsks.com with questions.

6/5 - 6/9 8:00 AM - 10:00 AM Grades 9-12 \$210

ACT Prep for Mathematics

Jack Stewart

This test preparation class will include a review of the mathematical concepts and strategies needed for a high level of success on the ACT. Each session will help students maximize their potential score by familiarizing them with the test format and types of questions, developing strategies with which to approach the test, and stressing areas to improve. Participants will be asked to complete practice problems and practice ACT tests outside of class. Students planning to take the ACT on June 10 could certainly benefit from this course.

6/5 - 6/9 10:15 AM - 12:15 PM Grades 9-12 \$210

ACT Prep for Science

Danielle Gerstner

This class will prepare students to take the science section of the ACT by teaching skills and test-taking strategies to improve their score. We will review science concepts, break down the structure of the science section, and focus on ways to maximize the time students have during the test. There will be time to go through questions together as well as for individual practice. Students planning to take the ACT on June 10 could certainly benefit from this course.

6/26 - 6/30 1:00 PM - 3:30 PM Grades 1-6 \$160

Anatomy & Physiology for Credit

Danielle Gerstner

This course is designed to offer students in Grades 10-12 the equivalent of a year-long study of Human Anatomy & Physiology. This rigorous, fast-paced class will cover the equivalent of three school days in each single 3-hour session. Students will participate in a variety of hands-on learning experiences through labs, six dissections, and working with the ANATOMY IN CLAY® skeletons. Expect this academic experience to be highly engaging, exciting, and rewarding! This course will conclude with an in-person final on Friday, July 28. Price includes lab fee.

Academic courses taught during Summer 2023 will follow the guidelines described by the 2022-23 Upper School Handbook. Students are permitted a maximum of three excused absences to obtain academic credit for the course due to the amount of material covered each day. There are no classes the week of July 3-7.

Completion of this course satisfies the Wichita Collegiate School graduation requirement for one academic elective credit. Taking this class does not reduce tuition for the 2023-24 school year at WCS. This class will show on the student’s academic transcript. Please note withdrawal/drop information listed below.

Class withdrawal/drop guidelines:

- May 22: \$45 cancellation fee, no impact on transcript
- June 19: \$145 cancellation fee, no impact on transcript
- June 26: \$195 cancellation fee, WP or WF designation on transcript
- June 30: no refund of class cost, WP or WF designation on transcript, final day to drop course

Arduino: Intro to Circuits

Joe Gehrer

Interested in how things work? Like to tinker with electronics? Know what a breadboard is? Arduino will teach you the science behind everyday items as you build and program your own custom circuits. Students will learn computer programming to control their circuits and will use problem solving skills while collaborating with peers. These step-by-step projects are perfect for beginners just starting out with circuits and computer programming.

Artificial Intelligence: Adventurers

Graduates of Stanford & MIT

At Inspirit AI, we believe that computational thinking primes our youngest minds to learn the tools that designers, artists, engineers, and scientists use to build solutions for an increasingly complex world. Computational thinking doesn't mean we'll turn your kid into a calculator, quite the opposite! Our classes encourage logic, creativity, pattern recognition, and abstraction along with an emphasis on mindfulness activities that promote social-emotional learning. Our personalized instruction ensures that your big kid can feel confident enough to tackle big kid challenges.

6/5 - 6/9 1:00 PM - 3:30 PM Grades 3-4 \$370

Artificial Intelligence: Pioneers

Graduates of Stanford & MIT

In AI Pioneers, our emerging engineers will learn how to create projects for social good with the Python programming language. Through hands-on coding, students will learn how computers can use data to solve complex problems like natural language processing and computer vision. Our students will explore the ways they can meaningfully use AI to predict heart disease, create social robots, assist with disaster relief, and navigate autonomous vehicles.

In our course, taught by Stanford & MIT AI researchers, we emphasize ethical responsibility, career paths in artificial intelligence, and interdisciplinary applications! From beginner to advanced coders, we envision a future where students of all backgrounds can contribute towards a bright future of inclusivity and technological advancement.

6/19 - 6/30 9:00 AM - 11:30 AM Grades 5-8 \$685

Artificial Intelligence: Scholars

Graduates of Stanford & MIT

Inspirit AI offers an interdisciplinary, project-based artificial intelligence education taught by Stanford, MIT, and top university graduates. What do self-driving cars, Alexa, and iPhone's face recognition technology have in common? They are driven by modern advances in artificial intelligence. Whether you're interested in law, healthcare, art, or economics, AI is poised to transform every discipline and industry in the future. AI is already all around us today, and by the end of the program, students will understand the underlying concepts and motivations behind technology such as computer vision, natural language processing, and neural networks.

Basketball Camp: Boys

Mitch Fiegel

If you are interested in a real basketball camp, then Coach Fiegel has the camp for you! Our primary goal is to prepare boys to be successful as basketball players. We focus on three areas to make that happen: fundamentals, attitude, and work ethic. We want every young man who leaves our camp to have a total and complete understanding of what it takes to be successful in the game of basketball.

Over the past 30+ years, Coach Fiegel has won six State Basketball Championships (1993, 1996, 2007, 2009, 2010, 2016). His TEAMS have also finished second (1998, 2015), third (1994, 2011), and fourth (2017), making 15 overall State tournament appearances. Coach Fiegel was chosen by the Wichita Eagle as their Metro Coach of the Year in 2007, 2009 and 2010, and Coach of the Year in 2007 and 2016. During the 2018 basketball season he celebrated with Wichita Collegiate School and his family upon achieving his 500th win as a head basketball coach.

When you think about what camp to choose this summer, ask yourself:

- Do you want a tough and challenging camp?
- Is 30+ years of summer camp experience important to you?
- Do you want your child to work harder than he has ever worked, while having fun at the same time?
- Do you, at some point, hope that your child will be a high school player on a great TEAM?

If the answer is yes to any of these questions, then this is the camp for you. We are committed to providing a challenging and instructional experience for your child. Every player will receive a basketball report card to evaluate his current skill level, as well as a camp T-shirt. Each session will be limited to 30 students to ensure quality instruction for each boy – so make sure to enroll early, as spots fill up quickly!

Breakout EDU

Joe Gehrer

In this course, students are put into immersive situations that promote teamwork and demand critical thinking and problem-solving skills to complete a common goal. These scenarios present the students with opportunities to find clues, collaborate with others, and learn from failure. Cooperation and collaboration are key components to being successful. Students will sharpen their listening skills, practice tactful ways to agree and disagree with others, and polish their ability to verbalize and execute their own ideas. Learning from mistakes and revising plans are additional life skills that come in to play when trying to “break out.”

Camp Collegiate

Scott Hawley

Camp Collegiate is a fast-paced, fun-based learning experience that will make summer days fly by! Boys and girls in Grades 3-8 will spend their days with friends and counselors participating in traditional camp activities like swimming, cooking out on a campfire, arts and crafts, having treats, horseback riding, games... and a lot of not-so-traditional activities, like feeding and caring for snakes and hamsters, studying ecosystems and astronomy, competing in science challenges, and building woodworking and electronics projects. Fun off-campus trips will include visiting the Oklahoma salt flats, exploring Tanganyika Wildlife Park and the Sedgwick County Zoo, as well as going to The Alley, All-Star Adventures, and ice skating. Kids will make great memories in this camp, and often say it's one of the best parts of their summer! Each day at camp begins at 9:00 AM with a game of Capture the Flag and ends at 3:00 PM with a fun closing activity where the “Happy Camper” for the day is announced. With all the amazing activities that this camp has to offer, it's a tremendous value for the price. There are no classes the week of July 3-7.

Chess Class: Advanced (Virtual)

Josh Fernandes

Students will go a step further from the Beginner class. We will discuss various openings and begin developing an opening repertoire to use for tournaments. Additionally, we will analyze more advanced middle and endgame scenarios, review some grandmaster games, and develop a strategy for how to think before every move. This class is designed for students who are already participating in tournaments and have some reasonable experience with chess. Sessions will be conducted virtually using Zoom, and students will play each other using virtual chess boards.

Executive FUNction Junction

Kristin Freed

Join the fun as we work on developing the essential skills necessary for students to thrive in all aspects of their life. These skills include focus, attention, self-control, communication, critical thinking, self-directed learning, and taking on challenges. Students will complete a variety of novel, stimulating activities both individually and within group activities to facilitate the development of these skills. Kristin has over 20 years of experience as a licensed Occupational Therapist with extensive training in sensory integration, visual processing, and neurodevelopment, and is able to couple her experience as a teacher with the knowledge of how kids learn to achieve a "just right" balance of fun and learning.

Government for Credit

Hans Widener

This course is designed to offer students in Grades 10-12 a comprehensive study of government in the United States, including the basic principles at local, state, and federal levels. They will be introduced to our political culture through an examination of our institutions, processes, and public places. During the final week of class, Monday-Thursday, July 17-20 will not be in-person as students will be completing a research project at home. The course will conclude with an in-person final on Friday, July 21.

Academic courses taught during Summer 2023 will follow the guidelines described by the 2022-23 Upper School Handbook. Students are permitted a maximum of three excused absences to obtain academic credit for the course due to the amount of material covered each day. There are no classes the week of July 3-7.

Completion of this course satisfies the Wichita Collegiate School social studies graduation requirement for one government credit and creates some flexibility for students by opening up an hour in their schedules for a further expanded curriculum during the normal school year. Taking this class does not reduce tuition for the 2023-24 school year at WCS. This class will show on the student's academic transcript. Please note withdrawal/drop information listed below.

Class withdrawal/drop information:

- May 22: \$45 cancellation fee, no impact on transcript
- June 12: \$145 cancellation fee, no impact on transcript
- June 19: \$195 cancellation fee, WP or WF designation on transcript
- June 23: no refund of class cost, WP or WF designation on transcript, final day to drop course

Jump Start to APUSH

Hans Widener

AP United States History is one of the most rigorous courses students will take during their junior year, and it requires a skill set unfamiliar to most. Over the course of the week students will get an introduction to APUSH and practice the skills necessary for success on the APUSH exam, including stimulus-based multiple-choice questions, AP-style short answer questions, and document-based questions. Additionally, students will get a jump on the course by learning supplemental content from the first and second units of APUSH. This class is highly recommended for juniors planning on taking the AP exam at the end of the year.

LEGO Explorations!

Martha Leaf

Gears, levers, pulleys, wheels, and axles bring models to life! Projects can range from building a step-by-step merry-go-round to inventing a vehicle replacing Cinderella’s broken-down pumpkin coach on the way to the ball. The guided explorations and inventive applications are appropriate for both interested beginners and experienced LEGO fans. LEGO Technic Kits and simple machine sets of 200+ pieces give every student the opportunity to explore areas of mechanical engineering through simple machines and structural experiments. Activities will focus on exploring, investigating, and problem-solving, and will provide challenging transitions from two-dimensional pictures into three-dimensional models. Students will gain great hands-on experiences, boost trial-and-error confidence, and learn valuable lessons in compromising during partner work. Open-ended design challenges will capture your child’s imagination! Thousands of additional pieces from LEGO resource sets will spark new and experienced summer LEGO builders. The grand finale will bring simple machines to life! Children will find this class energizing and entertaining as a favorite Summer Explorations class!

LEGO Explorations: Next Level with Stop Motion Video

Martha Leaf

This summer offering is a mash-up of screenwriting, engineering, and film production! Curious and creative young people will: collaboratively write an original screenplay; construct LEGO sets, props, and mini figures; and film all the action using stop motion animation, a technique that physically manipulates an object so that it appears to move on its own. Having witnessed over 20 years of “LEGO Explorations” enthusiasm at Summer Explorations, Mrs. Leaf predicts that this “Next Level” challenge will be engaging for all ages and talents. The possibilities are endless! And after all, there is an Oscar for Best Animated Short! Prior experience with writing, LEGO building, or filming is not necessary, but may be helpful. The integration of Next Level LEGOs is yet another way of bringing energy and entertainment to one of your child’s weeks of summer!

Read and Romp Summer Fun

**Belinda Mould
& Kathy Wagner**

Read and Romp is a long-standing tradition at Wichita Collegiate School, and we are pleased to be able to offer it again this summer! Combining reading with the joy of physical activity is a wonderful way to enhance a child's ability to retain information. Join us for a great time as we read short picture books and do corresponding physical activities that include games, relays, dances, and cooperative activities. Children will be excited to be active each day and will enjoy hearing new stories. Come read and romp with us!

SAT Prep for Critical Reading and Writing

Jillian King

Feed your body and mind! Get testing help and great snacks in a relaxed environment! Let's be honest: no one associates summer vacation with standardized test prep. However, for those brave souls willing to accept the challenge, we will be having great breakfast snacks as well as coffee, cocoa, and juice to ease into the morning. Our class will focus primarily on two areas: test-taking strategies to assist on the multiple-choice sections and writing strategies and individual analysis to assist on timed essays. Students planning to take the SAT on June 3 are encouraged to take this course.

Soccer Camp: Lower School Girls

Jillian King

Get out there in the sun for a week of soccer fun on the turf at WCS! Players of all skill levels are welcome, as we will work on basic foot skills, dribbling, and passing. Players will love the opportunity to engage in tactical work with players from the WCS Spartan soccer team. Players will also have the opportunity to develop in a series of small sided games and scrimmages, encouraging teamwork. All players will engage in a fun week of competition that tests them physically and mentally, while also growing their love of the game. Players should bring a ball and water bottle to each day of camp. Make sure to wear shin guards, cleats, light-colored clothing, and plenty of sunscreen.

Spartan Running Club

Mica Elkouri, Clark Ensz,
David Keller & Tiffany Lippoldt

The Spartan Running Club is for runners and athletes of all levels; from those just getting started to experienced runners who want to further develop their training. Learning to run with proper technique and to gradually build up endurance helps avoid injury and creates a better foundation—not only for runners but also for those aspiring to take on any other athletic endeavor. For those planning to run cross country in the fall, summer training is an essential part of preparing for the upcoming season. Runners will be working with a staff of coaches who have trained, competed, and coached at the collegiate and elite levels: Clark Ensz, Head Coach, WCS Upper and Middle School Cross Country and Track; Mica Elkouri, Assistant Coach, WCS Upper and Middle School Cross Country and Track; David Keller, Assistant Coach, WCS Upper and Middle School Cross Country and Track; and Tiffany Lippoldt, Head Coach, WCS Middle School Track, and Assistant Coach, WCS Middle School Cross Country. We will meet at the Southwest entrance to the track at WCS Coulter Stadium to start each practice. Please note, some of our running will take place in areas around campus (such as Lakepoint) during which times runners may not be under direct supervision. No practices will be held July 3-7 in accordance with KSHSAA regulations.

Summer Strength and Speed Training

Troy Black
& Dylan Heath

All classes will be taught in the state-of-the-art Lattner Center, as well as on the turf or track at WCS Coulter Stadium, and will be led by Troy Black, Head of the Spartan Strength and Speed program. Coach Black has been teaching weight training for 35 years. His assistants will be Cam Clark, ATC, Head Athletic Trainer for Via Christi Hospital and Kansas Newman University; Dylan Heath, CSCS, WCS Middle School PE teacher; and Kayleigh Roberts, ATC, Assistant Athletic Trainer at Kansas Newman University and WCS. Coach Black and his staff have many years of proven experience and knowledge in the realm of strength and speed development, and each session has a curriculum molded to the skill sets and abilities of the students. The curriculum and techniques, like the training center, are state-of-the-art and are presented in a positive and uplifting environment.

Grades 6-8:

Students will learn proper techniques for specific weightlifting and running exercises. The class will include speed development drills, speed and agility drills, plyometric drills, and core exercise. Tennis Academy

Dave Hawley

This class is for anyone, from beginners to experienced players who want to play for enjoyment. Summer Explorations is one of the longest running programs that WCS has to offer, and over the years, hundreds of players have gotten their tennis start under the tutelage of Coach Dave Hawley and his staff. Coach Hawley enjoyed a fine career of his own, being a significant member of his high school State Championship team at York High School in Nebraska, and then being the #1 player on his college teams at York College and Harding University. In his tenure at WCS, Coach Hawley has coached his teams to more than 50 State team titles, and over 75 individual titles. In addition, his teams have captured numerous league and regional crowns. He has a "no cut" philosophy; everyone plays. Coach Hawley has been Coach of the Year several times and was named to the initial class of National High School Tennis Coaches Hall of Fame. An incredible tennis experience awaits your child at all levels in the Summer Explorations Tennis Academy!

You may order a camp T-shirt for \$10 on the first day of camp. Please note, to check for rainouts for all tennis sessions call 316-259-7351. There are no classes the week of July 3-7.

Upper School Writer's Workshop

Jillian King

This will be a great week with an intensive writing focus for any student who wants to develop their skills, hone their craft, and receive feedback on their work. The focus of this week will be to expose students to a variety of different styles of writing, including but not limited to literary analysis, personal narrative, and expository writing. Students will have the opportunity to respond, in writing, to poetry and various forms of visual art. They will work to develop their own personal voice and style while putting their pen to the paper, and will be encouraged to work one-on-one with the instructor and their peers for feedback to develop their writing. This course will also focus on writing in phases, encouraging students to work through prewriting, early drafts, and revisions, to polished final works. A fun week to immerse yourself in writing and embrace your own creativity! Please bring a notebook, pens, and pencils to class.

Wee Write

Kristin Freed

Using a writing tool is one of the most complex skills children will learn to do. Did you know that expecting young children to attempt using a writing tool before laying an appropriate foundation can actually create bad habits or ineffective grasp and movement patterns? We need to be careful that we aren't expecting them to do too much too soon. Students in this class will have fun developing their sensory, visual motor, gross motor, attention, and fine motor skills to ensure a solid foundation for eventually learning to print. Weekly activities will be presented and shared with parents and caregivers so that ongoing practice with these appropriate activities can occur. Students will learn finger plays, activities to promote eye-hand coordination, and some basic tool use that will promote the development of prewriting skills. Kristin Freed, licensed Occupational Therapist, keeps the class size small in order to provide individualized instruction to facilitate each student's development regardless of their ability. She has over 20 years of experience working with young children and has proven effective in helping students be successful learning to write through her Write Stuff classes. Class size limited to six students.
