

TRIA IMPROVES **DIABETES MANAGEMENT**

A patient with Type 2 diabetes was taking Lantus Insulin and Metformin. Their HbA1C was 9% and blood sugar readings were consistently above 200 mg/dl

tria 
HEALTH

Tria Health provided resources and education regarding diet and lifestyle interventions to help reduce this patient's blood sugar levels. The patient reported that they were motivated to make changes because of the time Tria took with them to review and implement a health plan.
