

January 10, 2022

Dear Center Cass Families -

Below is an update on positive cases since last Friday afternoon. There were no close contacts in school.

Kindergarten – 2 cases  
First Grade - 1 case  
Second Grade - 2 cases  
Third Grade - 3 cases  
Fifth Grade - 3 cases  
Sixth Grade - 2 cases  
Seventh Grade - 2 cases

The bad news is that we have had 15 new cases since Friday. Some of the cases were new, from symptoms last week, and some were delayed results. The good news is that from our conversations with parents, the vast majority of students had mild symptoms and recovered quickly.

We continue to request ISBE and IDPH to provide their updated school guidance allowing us to move forward with the CDC shortened quarantine for students. Nurse Baek and I have a webinar tomorrow with ISBE and IDPH. We hope it is to review the requested school guidance and answer implementation questions before the release to the general public. As soon as I receive the guidance, I will link it in a letter to you with a summary,

Have a great afternoon.

Sincerely

Dr. Wise
