

## CLASS RANKINGS

Senior Honor Student designation and class rank shall be determined by grade-percentage average which will be computed to the thousandths of a percent and rounded to the nearest hundredth. Only those credits earned in 9 through-12 classes will be used in the ranking, but a student who takes a high school class while in junior high will have that class counted for graduation, honors points, and class rankings.

For purposes of designation of student honors and for college admission information, the end of the first semester of the senior year will serve as the cut-off date for computations of class rank.

All grades on the student's transcript will be included in determining that student's grade-percentage average and ranking in class. A failing grade will be included in the calculations unless the student, upon retaking the class, receives a passing grade, in which case only the passing grade will be used.

Class rank is to be determined by assigning the highest grade-percentage average a rank of 1; the second highest the rank of 2; etc. In cases where more than one student has the same numerical grade point average, all students with that average will be given the same rank. The next highest average will assume the next rank position which will indicate the number of students having a higher rank.

Honor Students: Every Senior student with an average of 93% or higher is considered an Honor Student.

Transfer Students: When transcripts of transfer students show such grades as P, U, or S, and where no equivalent letter grades can be obtained, such grades will not be counted in determining class rank. If a letter grade is available with no accompanying percentage value, that grade will be awarded the lowest percentage value using the Midway scale.
