

DATA PROTECTION & SECURITY BREACHES

Data Protection

The Midway School District will take reasonable security measures to guard against the foreseeable loss of private information. Private information is defined as that information protected under federal law, information defined as confidential or exempt in NDCC ch. 44-04, and data defined as “personal information” in NDCC §51-30-01 subsection two. Private information does not include publicly available information that is lawfully made available to the general public pursuant to state or federal law or regulation.

In determining the reasonableness of the district’s security measures, the Midway School Board will consider the value of private information in the district’s possession and the potential damages associated with the loss or compromise of this data.

All security measures will be delineated in a security system plan, which is exempt from North Dakota open records law. Creation of, discussion of, and revision to this plan will occur in executive session in accordance with North Dakota law.

Security Breach

State law defines “breach of security” in NDCC §51-30-01. Any security breach that meets this definition or any reasonable suspicion of such a breach shall be immediately reported to the Superintendent. The Superintendent shall put procedures in place to notify state residents affected by the breach as required by law.
