K-12 Education | Absence & Substitute

Important Updates for ReadySub Users and District Substitutes

We want to inform you about some changes coming to your school substitute technology solution, ReadySub. As you may already know, ReadySub allows your school district and many others to manage leave and substitutions via a web and mobile app. Our team recently joined Tyler Technologies, the largest company solely dedicated to public sector software, to better serve the K-12 industry.

To reflect the full functionality of the software and integration into Tyler's product suite, the **ReadySub name will officially change to "Absence & Substitute."** The name transition will be complete soon, with "Absence & Substitute, powered by ReadySub" being the interim name.

Absence & Substitute, powered by ReadySub empowers K-12 staff to manage their time off and know their approval status. We then help ensure that school districts can find the most qualified substitute to fill any absence.

If you are already using this solution, please note that you can expect the product login to move from the current ReadySub.com website to a new product page on the Tyler Technologies website. The ReadySub website will redirect to the new location, so your existing bookmarked links will still work. You can expect the same intuitive tools for full-time staff to manage time-off requests and for substitutes to view and apply for openings.

If you are not yet using this solution, click here to learn more about Absence & Substitute. The mobile app for iOS — and a new Android app coming in early 2022 — will also use the new name. Search the app store under 'ReadySub' or, soon, 'Absence & Substitute.'

For more information about using Absence & Substitute powered by ReadySub to manage leave and fill absences, please contact your district administration.
