

Creating Curiosity: A Non-Fiction Adventure

Humans are naturally curious creatures. We like to explore people, places, and events. What if we could use informational texts to tap into our students' innate curiosity? Would it be possible to harness our students' natural curiosity and encourage them to research? What if we could direct students' natural curiosity to help them think deeply and critically?

Sign up with a colleague and plan to attend this one-day brand new workshop designed to help educators learn how to harness and guide this powerful tool...curiosity. Discover texts and accompanying activities that will capture your students' interests! Refresh your own sense of discovery when it comes to reading and learning at the same time!

Date:	Wednesday, August 22, 2018
