STUDENT TRANSPORTATION SERVICES

MSD 531

The major purpose of school transportation is to get students who live an unreasonable walking distance from school to school and back in an efficient, safe, and economical manner. Other purposes include the provision of transportation for academic field trips in direct support of the curriculum, and transportation for support of the co-curricular program (athletics, music, drama, and the like).

District-contracted buses will be provided by the Board for the transport of students to and from school. However, as it is impractical to transport certain special education students by regular bus, they may be transported by other conveyance. The business manager, working in conjunction with the private bus contractor and school principals and under the supervision of the superintendent, will be responsible for the day to day operation of the school transportation system and the scheduling and routing of all buses, bus stops and all regulations of the program.

Vehicles contracted by the Board will be operated by authorized, licensed employees of the private bus contractor. These individuals must meet all state requirements for licensing.

Management of the school transportation program will meet the following criteria:

1. Adequacy: Does the program provide both necessary and sufficient transportation to and from school and for all other school programs?
2. Safety: Does the scheduling and operating of the program take into consideration hazards, potential dangers to pupils, and all appropriate safeguards?
3. Economy: Is the program operated in the most efficient manner possible after considering the constraints imposed by criteria of adequacy and safety?

Evaluation: The school transportation program will be monitored by the business manager and the principals or their designees daily and subjected to periodic evaluations by them as necessary.
