

ACCIDENT PREVENTION AND SAFETY PROCEDURES

Student safety will be considered a part of the general education program. Students in science and industrial arts classes will be given an orientation each semester to familiarize them with the equipment and materials they will be using and the dangers involved if safety precautions are not taken. Signs will be posted in rooms as a constant reminder of these safety precautions.

Every student, teacher and visitor is required to wear an industrial quality eye protective device when participating or observing any of the following courses:

1. Vocational or industrial arts shops or laboratories involving experience with the following: hot molten metals; milling, sawing, turning, shaping, cutting, grinding or stamping of any solid materials; heat treatment, tempering or kiln firing of any metal or other materials; gas or electric arc welding; repair or servicing of any vehicle; caustic or explosive materials.
2. Chemical or combined chemical-physical laboratories involving caustic or explosive chemicals or hot liquids or solids.
