

Children should be healthy, safe, and ready to learn.

PAT helps make that possible.

The **Parents as Teachers (PAT) Program** is an evidence-based home visiting program for any caregiver with a child between the ages of 0 to 5.

Professional PAT Parent Educators provide parents and caregivers with research-based information from birth through kindergarten. The early years of a child's life are critical for optimal development, and PAT provides a foundation for success.

PAT Parent Educators work with caregivers in their homes to help children develop, learn, and grow to realize their full potential.

HOW PAT WORKS:

There are 4 components to the PAT Model: Personal Visits, Group Connections, Resource Network for families, and Child Screenings. Together, these components increase parent knowledge of early childhood development and improve parent practices, provide early detection of developmental delays and health issues, prevent child abuse and neglect, and increase children's school readiness and success.
