

Procedure to connect to J-touch via EShare.

1. OPEN ESHARE ON J-TOUCH.

(ESHARE Icon→)

YOU HAVE TO OPEN

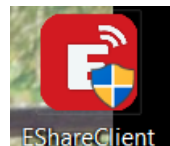

ON J-TOUCH 1st

(When you open ESHARE on the J-touch it will look like this. ↑)

2. OPEN ESHARE ON COMPUTER.

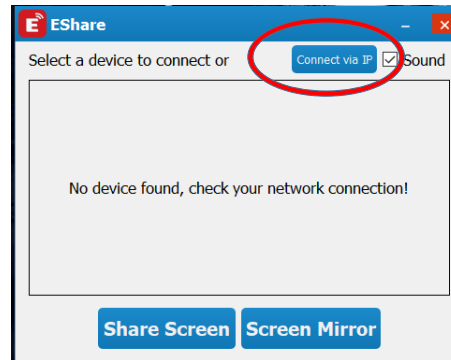

(The ESHARE icon on your laptop looks like this. →)

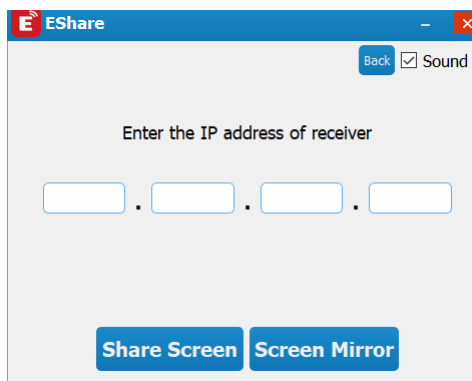

(Once you open ESHARE on your computer it will open and look like this.→)

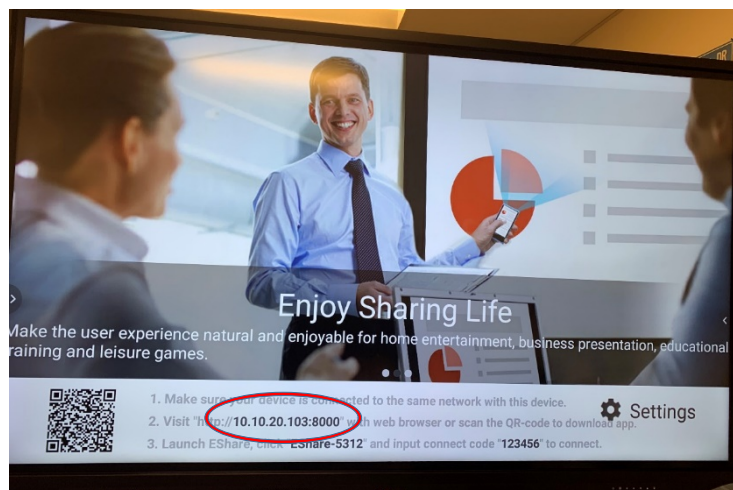

3. CLICK CONNECT VIA IP.

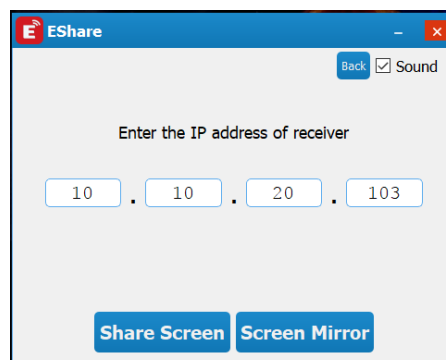

(It will open to this screen.↓)

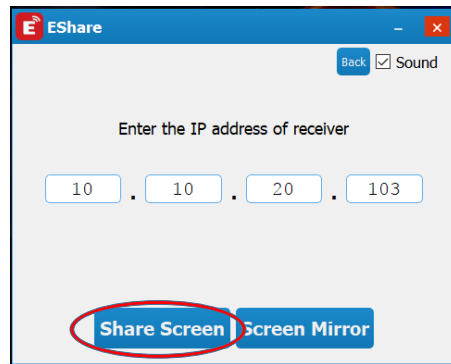

(The IP address you will enter, will be on the screen on your J-touch and will look like this. ↓)

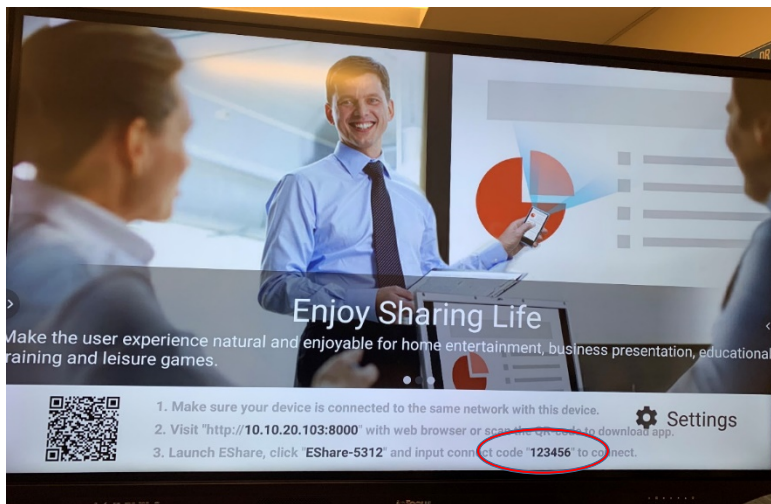

(You will enter whatever **YOUR** screen says, without the: 8000. **Every J-touch has its own unique IP address.**)

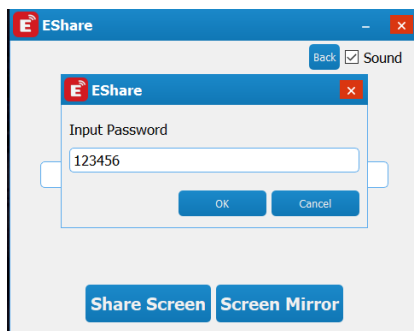

4. CLICK SHARE SCREEN.

(Once you click Share Screen, You will be prompted to enter the password. The Password is also on your J-touch screen.↓)

(You will enter in your password in the area provided on your computer screen. **All** passwords will be **123456**.)

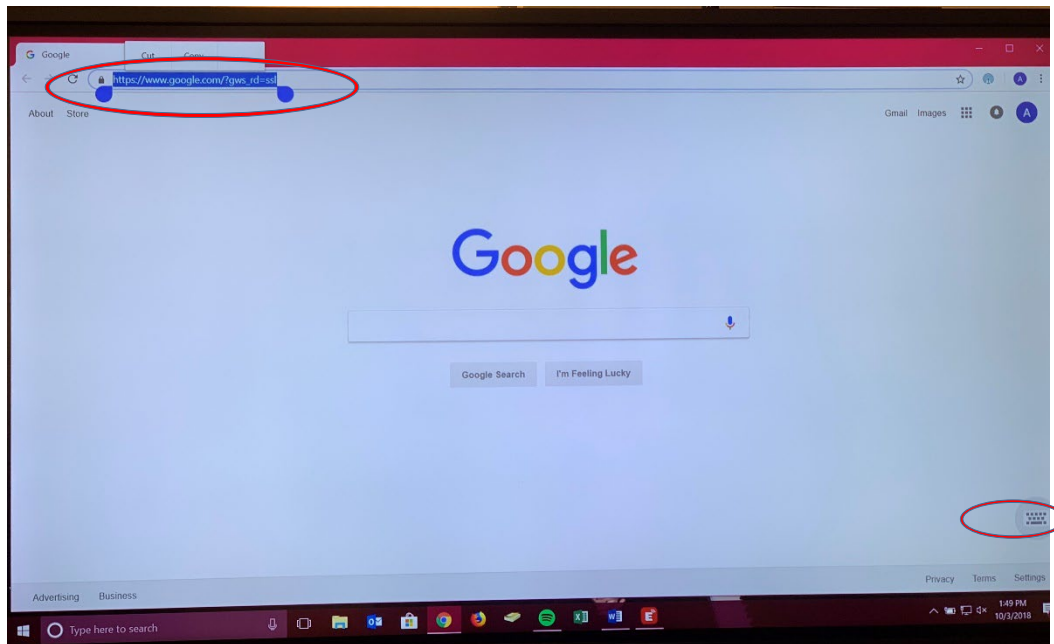

(Click Ok after you enter in your password)

Now you are ready and connected. You will see anything you have open on your computer screen projected on to your J-touch.

You can now control your computer by touch on the J-touch screen.

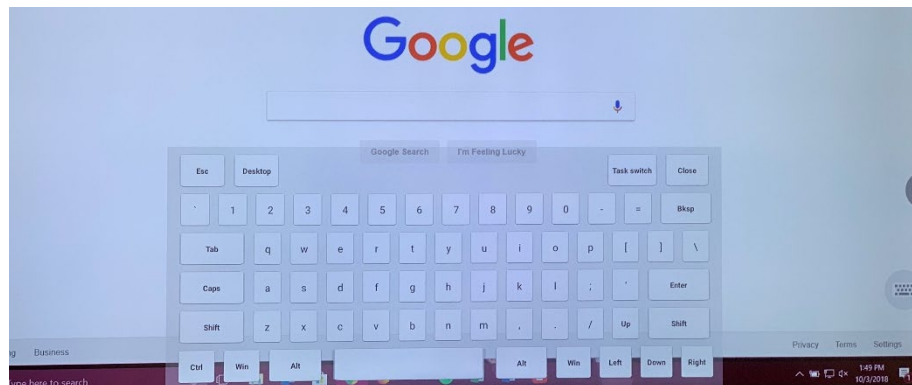

Double click on **anything** you want to open. (You can open anything from your computer onto the J-touch. EX: Word, Power Point, Google, Youtube.)

You can also browse the web by tapping the search tool bar.

(Then, at the bottom right hand corner of the J-touch you will see a key board icon and click it to begin typing.)

(The key board will open and look like this↓. When you are done typing tap the say keyboard icon to hide it.)

If you have any questions feel free to put in a work order and we can help you.
