

Targeted Tier 1 Interventions

Teams will review progress after 6 - 9 weeks

If a student is at or above the 50% on benchmarking data and is functioning within the average range of the classroom, then **move to Tier 1**.

If student's benchmarking or progress monitoring data continues to be between the 25%-50%, **continue Targeted Tier 1** by supporting and monitoring in the classroom for another 6-9 weeks.

If student's benchmarking data continues to be between the 25%-50% develop a **classroom Targeted Tier 1 plan**. Monitor classroom performance and review progress in another 6-9 weeks.

If student's progress monitoring data indicates three consecutive data points below the aim line, and classroom data indicates student is functioning in the bottom quarter of the class then **develop a Tier 2 plan**. Progress monitor every other week for 6-9 weeks.

See Tier 2 Intervention Flow Chart
