

# Tier 2 Interventions

Teams will review progress after 6 - 9 weeks

If a student is at or above the 50% on progress monitoring data and is functioning within the average range of the classroom, then **move to Tier 1.**

If student's progress monitoring data is at or approaching aim line, **continue Tier 2 interventions** for another 6-9 weeks. Continue progress monitoring every other week. Increase goal if appropriate.

If student's progress monitoring data indicates three consecutive data points below the aim line, then **change the Tier 2 intervention** by altering duration, frequency, size of group, grouping and/or program. Continue for another 6-9 weeks.

If Progress monitoring data indicates steady progress and a minimum of three consecutive data points on or approaching the aim line and the rate of improvement is average to above average, then **move to Targeted Tier 1.**

If progress monitoring data continues to be below the aim line but the student is making consistent progress **continue Tier 2 interventions** and progress monitor for another 6-9 weeks.

If progress monitoring data is below the 10% on national norms, the rate of improvement is below average, there has been at least one change of intervention, and interventions have been implemented with fidelity, **continue current intervention or change the Tier 2 intervention** and continue progress

If progress monitoring data is below the 10% on national norms, the rate of improvement is below average, there has been at least one change of intervention, and interventions have been implemented with fidelity, **continue current intervention or change the Tier 2 intervention or initiate Tier 3 Individual Problem Solving.**
