NEWS ALERT!

Twelve super tasty heroes have been discovered living in Healthyville, Texas. Each month we will learn about the super powers each one has grown to have. Having taken root in the town's gardens, kitchens, farmers markets and groceries, these mild-mannered vegetables use dirt, water, & sunlight to transform into powerful fighters for nutrition, strength and power. Kapow!!!

PROFESSOR GREEN Cabbage

Professor Green was just a little sprout wilting in the sun in a Healthyville garden. A full solar eclipse passed overhead giving him the shade he needed that day and a special sun particle landed on his head. That particle gave the tiny cabbage a brain and he became Professor Green. The professor used his knowledge to teach all the cabbages how to use the vitamin K they have in abundance to assist blood cells in healing when human skin gets a cut. Professor Green also taught the cabbages how to grow a head from just the leaves left behind when a head is harvested.

FUN FACTS

Cabbage is a cole crop. It grows in cool seasons like broccoli, cauliflower and Brussels sprouts. Cabbage is one of the easiest crops to grow. It does the best in full sunlight and sandy soils. There are several different varieties such as Golden Acre, Market Prize and Green Boy.

MATCHING

I have several members on my cabbage team—Professor White, Professor Green and Professor Purple. You can see we are named for the color of our leaves. Can you help each of my team members find their correct color? Draw a line across to match the name to the picture.
