

# ROCKET KIDS

## **NOW SCHEDULING 2023** ***AUTHOR VISITS***

Children's author Lizzie Lipman brings the science of her books to life through a fun, engaging, and interactive 45-minute author visit that will not only teach students about the fascinating details of space featured in her books but will get students thinking like an author and viewing our own planet through a sci-fi lens.

Along with reading a chapter from *Adventure to Mars*, Lizzie will lead an energetic discussion about her writing process, thinking like a scientist, and learning how to differentiate between fact and fiction. There will be ample opportunities for students to get involved, ask questions, and show off their own knowledge about space.
