

2021-2022 Title VII Program

**Bishop Union High School
Palisade Glacier High School
Bishop Independent Study Program
Keith Bright High School**

November 2022

Palisade Glacier & BIS

Palisade Glacier High School is the continuation school for Bishop Unified School District. PGHS is a place where students may come to catch up on credits and experience a small school environment with a dedicated, talented staff passionate about serving students.

Appropriate, Calm, Fair, Just, Respectful--these character traits are part of our contract for essential conduct and our expectations for every student and staff member. Respect for self, others and environment summarizes these traits--and is our focus for PBIS (positive behavior intervention and support). These expectations set the stage for a successful academic environment. It is our mission as a staff to support students to become successful academically, socially, and for their transition into college, career, and adulthood. To that end, it is of primary importance that we provide counseling for and scholarships to post-secondary education. It is also crucial that students uphold their part of the contract by working hard and making good progress on academics. This is a team effort--together, along with parents and community support, we can go beyond expectation as individuals and as a campus.

Campus Activities

Keith Bright High School

Enrollment and attendance has fluctuated at Keith Bright High School through the years. Students enroll and transfer periodically within the school year.

The 2021-2022 school year began with no Native American student enrollees and we ended the year with just one student enrolled.

Our Native American student population seems to have declined at KBS which indicates a trend of fewer students involved with the juvenile justice system.
