Grounds Department – Maintenance Department

999 N. Front Street
Whiteland, IN 46184

Dear Parent/Guardian,

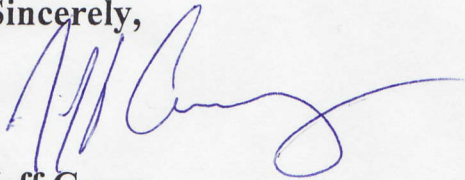

From time to time it is necessary to apply lawn and pest control spray to our school lawns, athletic fields and our school buildings. While we do not use any restricted use chemicals, we are required to make advance notification to any parent who wishes to be notified prior to the application. We also make every effort to spray when children are not near the application area, and time the application so that it has time to dry before children are present. Once again, it should be pointed out that we use nothing different on school lawns and in our buildings than what companies use when caring for residential homes and lawns.

If you desire to be notified prior to these applications, please sign the form below, and include printed name, address, phone number, email address (if possible) and building that your child attends. We will make every effort to notify you at least 48 hours prior to the application.

Please return the completed form to your child's school.

Thank you.

Sincerely,

Jeff Curry
Supervisor of Grounds

Phil Martin
Supervisor of Facilities/Maintenance
