

If your child received an immunization over the summer, please bring a copy of his/her updated immunization record to Meet & Greet today to give to the school nurse. If you need to know what the current required immunizations are for school attendance, please refer to the HCS website or app under Documents>Important Documents>Medical Forms>LDH Child/Adolescent Immunization Schedule.

Immunization dissent forms must be renewed each school year according to the Louisiana Department of Health. These forms can be found on the HCS website or app under Documents>Important Documents>Medical Forms>Statement for Immunization Dissent. Please print and complete a form for each applicable student to turn in to the nurse at Meet & Greet.

The school nurse will be present at Meet & Greet to accept emergency medications and approved medications for chronic conditions which will be kept at school for the 2023-2024 school year. These medications must be accompanied by a Louisiana Medication Order Form, Parent Request to Administer, and 2023-2024 Health Information Form. The forms must be completed in full and dated after June 30, 2023. You can copy and print these forms from the website or app under Documents>Important Documents>Medical Forms.

Students may have ongoing medical conditions that do not require medication administration or treatment during school hours. If your child is one of these students, please print and fill out a Health Information Form found on the website or app under Documents>Important Documents>Medical Forms>Health Information Forms. Use these forms to supply information to the staff of special needs that may affect his or her school day such as food intolerances, allergy or asthma triggers, history of seizures, ADD/ADHD, digestive disorders, emotional or psychological disorders, vision or hearing disorders, or need for bathroom privileges, etc. These forms should be completed annually. Please turn them in to the nurse at Meet & Greet.
