STARLAB  
Portable Planetarium  
Training  
Intro/Refresher Day**

The East Central ESC loans two portable STARLAB planetariums to member schools for a one-week period during the school year. The STARLAB is delivered directly to you and picked up from your doorstep by ECESC courier! However, to utilize this valuable resource, teaching staff must attend a day-long training on the set up and use of the equipment.

Intro/Refresher Day is for first time users and those who want a reminder about all of the features of the planetarium. **Presenter Dave Sell**, NASA Aerospace and Technology Specialist and 6th grade teacher at North Decatur Elementary School, will demonstrate beginning through advanced astronomy concepts. He will show how your students can view the sun against a background of stars in the daytime or against a night sky. Participants will return to their classrooms with a plethora of resources, well prepared to facilitate discussions with their students in the STARLAB.

**DATE:** Monday, November 5, 2018  
**LOCATION:** East Central ESC in Connersville  
**AUDIENCE:** Teachers from member schools
