Only students enrolled in agricultural courses are eligible for FFA membership

Introduction to Agriculture, Food & Natural Resources

Course Length: One semester
Grade Level: 9, 10
Prerequisite: None
Course Credit: 5 credits

This curriculum emphasizes the major components of the agricultural, food, fiber, & natural resources systems. This course will prepare students to make informed decisions of the program of study in which they are interested. This course will allow students to experience seven agricultural pathways: Agribusiness, Animal, Plant, Natural Resources, Environmental, Food Processing, and Power, Structural, & Mechanical Systems through hands-on laboratory experiences. It will introduce students to the Agricultural Education Model of Classroom/Lab Instruction, Supervised Agricultural Experiences, and FFA. **Highlighted in the course are several FFA events including Public Speaking, Animal Evaluation, Food Science, Parliamentary Procedure, Natural Resources, and many others.**

Natural Resources

Course Length: One semester
Grade Level: 9, 10, 11, 12
Prerequisite: None
Course Credit: 5 credits

Curriculum emphasizes basic scientific principles involved in conserving and/or improving natural resources such as air, water, land, forestry, wildlife, and energy. Students will gain an understanding of alternative energy, important natural resources in Nebraska, and basic wildlife management. **This course will also highlight the FFA Natural Resources, Land Evaluation, and Envirothon events.**

Plant Science

Course Length: One semester
Grade Level: 9, 10, 11, 12
Prerequisite: None
Course Credit: 5 credits

This course applies scientific principles to the management of plants. Topics covered include structure and function of plants, including requirements for growth, methods of propagation, plant anatomy, nutrition, and the management of pests and diseases. Identification and selection of plants along with their use and functions and physiological processes are also stressed. Students will gain hands-on experience in the plant science industry. **This course will highlight the FFA Nursery and Landscape, Land Evaluation, Floriculture, and Agronomy events.**

Animal Science

Course Length: One semester
Grade Level: 9, 10, 11, 12
Prerequisite: None
Course Credit: 5 credits

This course is designed to help students develop a foundational understanding of biological principles of animal production which will influence and affect management decisions. Students will gain a basic understanding of animal anatomy, physiology, genetics, nutrition, health, and animal welfare. **This course will also highlight the FFA Meat Science, Livestock Management, Veterinary Science, and Livestock Selection Events.**

Companion Animals

Course Length: One semester
Grade Level: 9, 10, 11, 12
Prerequisite: Animal Science recommended
Course Credit: 5 credits

This is a course to help students demonstrate a basic understanding of the care of small animals, while also understanding the biological principles of small animals which will influence and affect management decisions. Students will study companion animals including cats, dogs, rabbits, rodents, other small mammals, birds, fish, reptiles, & other companion animals. **This course will highlight the FFA Veterinary Science Event and prepare students for responsible pet ownership.**

Agribusiness

Course Length: One semester
Grade Level: 10, 11, 12
Prerequisite: None
Course Credit: 5 credits

This course will focus on the study of business organizations & structures, economics, starting a business, developing a business plan, credit, loans, taxes, contracts and business records. This course will give students interested in Agribusiness, Ag Lending, and risk management an introduction and overview of these career fields. **This course will also highlight the FFA Farm Management, Ag Issues, Agricultural Sales, and Agricultural Marketing events.**

Aq Sales and Marketing

Course Length: One semester
Grade Level: 10, 11, 12
Prerequisite: None
Course Credit: 5 credits

This course is designed to provide agriculture students the opportunity to investigate agricultural sales and marketing. Content includes entrepreneurship, product/service promotion, sales and marketing skill development, and leadership development. **This course will also highlight the FFA Agricultural Sales, Agricultural Marketing, and Agricultural Communications events.**

Large Animal Management

Course Length: One semester
Grade Level: 10, 11, 12
Prerequisite: Animal Science recommended
Course Credit: 5 credits

This course is designed to help students utilize the biological principles of animal production to influence the animal management decisions. It will focus on the management of animals as a food source through dairy, red meat, and poultry production. Students will become educated consumers of animal products as a result of taking this course. **This course will highlight the FFA Livestock Management, Meats Evaluation, Livestock Selection, Dairy Selection, and Horse Evaluation events.**

Landscape Design

Course Length: One semester
Grade Level: 10, 11, 12
Prerequisite: None
Course Credit: 5 credits

This course will identify opportunities in interior and exterior landscape design and management, nursery production and turf management industries. Students will describe the elements of design, maintaining, and constructing landscapes and designs, giving them knowledge for continuing education and employment in the horticulture industry through hands-on experience. **This course will highlight the FFA Nursery and Landscape, Floriculture events.**

Advanced Agricultural Studies

Course Length:	One semester
Grade Level:	11, 12
Prerequisite:	Base course in the intended area of study such as Plant Science, Nursery Landscape, Floriculture, Animal Science, Companion Animals, Large Animal Management, Agribusiness, Ag Sales, Natural Resources, Wildlife Management, Vet Science.
Course Credit:	5 credits
Cost:	\$20 Curriculum Fee

This course allows students to continue studying a specific topic learned in one of the basic level courses. Because it is set up as an advanced study, students must have received a C or above in the base course and be responsible as well as self-motivated to work on their project of choice. Outcomes of this course may include Agriscience Fair research projects; demonstrations, advanced landscape or floral designs, planning and executing educational experiences for youth and/or adults, etc. Students planning on enrolling in the Small Engines study will also be enrolled in the OSHA General Agricultural Industry Safety course at a fee of \$25. **Students will be exposed to a large variety of FFA events and competitions.**

Welding

Course Length:	One semester
Grade Level:	10, 11, 12
Prerequisite:	None
Course Credit:	5 credits
Cost:	\$15 Consumables Fee
Other:	Safety glasses, welding helmets, gloves, and pliers are required and provided. Students may purchase their own gloves or safety glasses from the teacher.

Students enrolled in this course study basic welding techniques covered in the areas of TIG, SMAW, GMAW, oxy-acetylene welding and cutting, plasma cutting. Students will study metals only and industry application will be discussed. Academic study through bookwork and research will be incorporated with welding practice. Safety glasses, welding helmets, gloves and pliers are required and provided. Students may purchase their own gloves or safety glasses from the teacher.

Note: Successful completion of this course is required for the acceptance into the Southeast Community College Career Academy.

Introduction to Business

Course Length: One semester
Grade Level: 9, 10
Prerequisite: None
Course Credit: 5 credits

This survey course is designed to introduce the student to the principles and functions of business. Business will be studied as part of a total social, political and economic environment. The various functional areas of business will be discussed; economics, forms of business ownership, small business, entrepreneurship, management, human relations, marketing, accounting, finance, stock market and business law. Emphasis will be placed on hands-on activities, web-based activities, and real-life application.

Information Technology Applications I

Course Length: One semester
Grade Level: 9, 10, 11, 12
Prerequisite: None
Course Credit: 5 credits

Students will explore emerging technologies as it applies to their success in high school, college, and career. The focus will be on the importance of digital citizenship, professional communication practices, advanced document processing, professional presentations, and intermediate spreadsheet and database applications used personally and professionally.

Information Technology Applications II

Course Length: One semester
Grade Level: 9, 10, 11, 12
Prerequisite: Knowledge of Microsoft Office is a must.
Course Credit: 5 credits

This course will focus on skill development in advanced spreadsheet, database, integration of applications utilizing advanced features, and exploring web technologies. Additionally, students will develop skills in desktop publishing and will identify issues related to Internet use and security, electronic communication, and ethics.

Advanced Publications

Course Length: Two semesters
Grade Level: 9, 10, 11, 12
Prerequisite: An application may be required
Course Credit: 10 credits

Broadcast journalism will focus on the implementation of Striv TV at Waverly High School. Students will learn to use equipment – setting up and tearing down – as well as the facets of broadcasting live events. Striv U zoom sessions will be used to help teach students how to use wirecast, adobe, slack and photoshop. Students will be trained on proper interviewing techniques as well as how to broadcast a live sporting event. Podcasting and using social media platforms such as Twitter, Instagram and Snapchat will be used to tell the stories of the many successful activities and students at Waverly High School.

Viking Yearbook

Course Length:	Two semesters
Grade Level:	9, 10, 11, 12
Prerequisite:	An application may be required
Course Credit:	10 credits
Registration Form:	Students will receive a follow-up email
Other:	Students will be held financially responsible for all equipment checked out to them during the class

This journalism class is designed to give students the various skills required in the publication of a yearbook. Although writing, interview, and photography skills are desirable, eagerness and enthusiasm are mandatory. Students will learn group cooperation along with the many aspects of layout, design, theme development, and copywriting associated with yearbook creation. Each student will produce the design, written material and photos pertaining to a particular topic in the school year. Throughout the course, students will gain an appreciation and distinct awareness of the “school year,” an understanding that the yearbook serves as an archive and memory book, and an ability to approach new people in a variety of settings.

Duties and Responsibilities of a Viking/Yearbook Staff Member

As a Viking/Yearbook Staff Member you will:

- 1) Meet deadlines and be responsible for completing your pages; designing layouts, proofing, editing, etc. (May require before/after school time)
- 2) Go to the events of the pages you are given; take pictures, meet with advisors, administrators, students and/or coaches to get background information or interviews. (May require before/after school time)
- 3) Sell Business/Senior Ads to raise money for our book!
- 4) Come to class on time and prepared to work. Because it is a class, it takes precedence over extracurricular activities!
- 5) Be a team member! We will need everyone’s help in order to create our book! This may require you to help other staff members cover their events.
- 6) Be organized and work independently. You are responsible for covering your events and knowing when they are. You will be given a lot of materials and expected to refer to them when designing your layout, taking pictures, writing copy, etc.

Web Page Design

Course Length: One semester
Grade Level: 10, 11, 12
Prerequisite: None
Course Credit: 5 credits

The purpose of Web Design is for students to understand the general design concepts and process of developing a website from sketches to publishing. In this semester-long course, students will receive a fast-paced introduction to today's most cutting-edge e-commerce topics and understand Web Design concepts and techniques that are essential to planning, creating, testing, publishing, and maintaining Websites.

Entrepreneurship

Course Length: One semester
Grade Level: 10, 11, 12
Prerequisite: None
Course Credit: 5 credits

Entrepreneurship emphasis is placed on the evaluation of the business skills and commitment necessary to successfully operate an entrepreneurial venture and review the challenges and rewards of entrepreneurship. The role of entrepreneurial business in the United States and the impact on the national and global economy will be explored. Instructional strategies may include the development of a business plan, operation of school-based business, or actual creation of a student-run business.

Business/Personal Law

Course Length: One semester
Grade Level: 10, 11, 12
Prerequisite: None
Course Credit: 5 credits

This course acquaints the student with the American legal system and how it relates to each person today. Topics include rights and obligations of minors, law enforcement, lawsuits, torts, consumer law, law-related careers, and other pertinent current events. Presentation of materials is offered through class discussion, case problems, dramatizations, films, and guest speakers. The class takes a field trip to see an actual case trial in session, to experience a small claims court session, and to tour a correctional center.

Computer Science

Course Length: Two semesters
Grade Level: 11, 12
Prerequisite: None
Course Credit: 10 credits

A course designed to teach problem-solving skills through the use of languages such as Python, Java, and HTML. The following structured programming concepts might be included: top-down design, output design, hierarchy chart, program design, coding and testing, flow charting, editing and debugging.

Personal Finance

Course Length:	One semester
Grade Level:	12
Prerequisite:	Required
Course Credit:	5 credits

Personal Finance is designed to help students manage their resources and to make sound personal financial decisions. Students have the opportunity to determine how economic factors affect planning and budgeting. They will improve their judgment and abilities in using credit, being a wise consumer, preparing income tax forms, earning a paycheck, and saving and investing money.

Accounting 1

Course Length:	Two semesters
Grade Level:	11, 12
Prerequisite:	None
Course Credit:	10 credits

The purpose of Accounting is to give students an understanding of the basics of the accounting cycle for both a sole proprietorship and corporation through practical, hands-on application. Accounting is the language of business. To know about analysis of transactions, journaling, posting, cash controls, inventory, and payroll is essential to understanding business in general. Technology will be implemented as a key component through the use of paperless working papers (all online, graded online). Assessments will be online.

Note: Dual-credit with Nebraska Wesleyan is possible if completing two full years. Do Not register for dual-credit until enrolled in the 2nd year.

Accounting 2

Course Length:	Two semesters
Grade Level:	11, 12
Prerequisite:	Accounting 1
Course Credit:	10 credits

Accounting 2 presents a continuation of concepts and procedures from Accounting 1. Through online (paperless) practice, the emphasis will be on departmentalization, responsibility accounting, financial statement interpretation, the time value of money, and projections. In other words, we will go beyond the bookkeeping and enter into interpretation and analysis.

Note: Dual-credit with Nebraska Wesleyan is possible if completing two full years. Do Not register for dual-credit until enrolled in the 2nd year.

Microeconomic Principles

Course Length: One semester
Grade Level: 10, 11, 12
Prerequisite: None
Course Credit: 5 credits

The purpose of microeconomics is to give students a thorough understanding of the principles of economics that apply to the functions of individual decision makers, both consumers and producers, within an economic system. It places primary emphasis on the nature and functions of product markets and includes the study of market factors and the role of government in promoting greater efficiency and equity in the economy.

Throughout this course, you will experience cross-curricular activities: the scientific method, graphing, ratios, reports, monetary figures, other statistics comparisons, data creation and analysis. All this in the name of economic study and understanding.

****College Credit Option:** Microeconomic Principles provides students the option of enrolling in the Nebraska Wesleyan University Honors Academy in order to receive both high school and college credit. Students who dual enroll will be granted 3 credits for ECON 1540 by Nebraska Wesleyan following the successful completion of one semester of Microeconomic Principles. Students interested in this option will be able to register and to pay the approximate \$285 tuition for the Honors Academy at the onset of the course.

Note: Any sophomore taking this course CANNOT receive dual-credit through the Nebraska Wesleyan Honors Academy. Only high school juniors and seniors are eligible for the college credit option.

Macroeconomic Principles

Course Length: One semester
Grade Level: 10, 11, 12
Prerequisite: None
Course Credit: 5 credits

The purpose of macroeconomics is to give students a thorough understanding of the principles of economics that apply to the economic system as a whole. The course places particular emphasis on the study of national income and price-level determination and also develops students' familiarity with economic performance measures, the financial sector, stabilization policies, economic growth, and international economics.

Throughout this course, you will experience cross-curricular activities: the scientific method, graphing, ratios, reports, monetary figures, other statistics comparisons, data creation and analysis. All this in the name of economic study and understanding.

****College Credit Option:** Macroeconomic Principles provides students the option of enrolling in the Nebraska Wesleyan University Honors Academy in order to receive both high school and college credit. Students who dual enroll will be granted 3 credits for ECON 1530 by Nebraska Wesleyan following the successful completion of one semester of Macroeconomic Principles. Students interested in this option will be able to register and to pay the approximate \$285 tuition for the Honors Academy at the onset of the course.

Note: Any sophomore taking this course CANNOT receive dual-credit through the Nebraska Wesleyan Honors Academy. Only high school juniors and seniors are eligible for the college credit option.

Nutrition and Food

Course Length:	One semester
Grade Level:	9, 10, 11, 12
Prerequisite:	None
Course Credit:	5 credits
Cost:	\$20 fee (covers cost of food you produce and consume in the food labs)

In this semester-long course, students will develop the base foundation knowledge of food selection and preparation needed to successfully fuel the human body through consumption of food and resulting food energy. With a beginning foundation of nutrition, students will learn basic preparation skills and the short-term and long-term wellness consequences as a result of nutritional intake, and exposure to careers related to the food industry. Students will leave the class being able to plan, produce, and communicate the importance behind healthy meals & habits to a specified target audience.

Fashion Design Skills

Course Length:	One semester
Grade Level:	9, 10, 11, 12
Prerequisite:	None
Course Credit:	5 credits
Cost:	Student is responsible for the purchase of supplies needed for this course.

This course is a personalized course for individuals interested in fashion and clothing construction. All students will apply the principles of design to hands-on projects meeting the needs of various populations and scenarios through design planning and presentation. Students who are interested in fashion and construction will cover: Basics of Textile and Apparel Design, Selection/Construction/Maintenance/ and Alterations of Textile Products, and Related Careers. It is recommended to enroll in Advanced Fashion Design Skills and Entrepreneurship to advance the skills learned in this course.

Interior Design Skills

Course Length:	One semester
Grade Level:	9, 10, 11, 12
Prerequisite:	None
Course Credit:	5 credits
Cost:	\$10 consumable fee. Student is responsible for the purchase of additional supplies needed for this course.

This course is a personalized course for individuals interested in designing homes and interiors. All students will apply the principles & elements of design to hands-on projects meeting the needs of various populations and scenarios through design planning and presentation. Students who are interested in designing homes and interiors will cover: Housing Influences & Choices, Basics of Housing & Interior Design, & Related Careers. It is recommended to enroll in Advanced Interior Design Skills and Entrepreneurship to advance the skills learned from this course.

Culinary Skills

Course Length:	One semesters
Grade Level:	10, 11, 12
Prerequisite:	Pass Nutrition & Foods with a B or above
Course Credit:	5 credits
Cost:	\$20 fee (covers cost of food you produce and consume in the food labs)

Deepen your understanding of food preparation, food science, and nutrition. This course is an industry-driven curriculum that prepares students for careers in the restaurant and foodservice management industry. Begin developing culinary skills to be applied to your family, friends, or the development of a business. In this semester-long course, students will transfer their knowledge developed from food science and nutrition to beginning culinary skills in hands-on food labs and real-life business experiences. It is recommended to enroll in Advanced Culinary Skills to advance the skills learned from this course.

Child Development

Course Length:	One semester
Grade Level:	10, 11, 12
Prerequisite:	Have a valid driver's license/can drive OR parent permission to ride with another student.
Course Credit:	5 credits

How do early childhood experiences shape a community? Discover & deepen your knowledge, skills and practices necessary for nurturing the growth and development of children. This course evaluates the effects of parenting roles and responsibilities in supporting the development of a child and family. The big ideas uncovered in this course are: conception, prenatal development, healthy pregnancy, birth, physical, emotional, intellectual, and social development of infants, toddlers, preschoolers, & children, child care and early education, and careers working with children. Students will attain hands and minds-on experiences through observing and interacting in child care facilities and classrooms. Parenting theories, skills, and practices will be infused through each stage of development. It is recommended to enroll in Advanced Child Development Practicum after taking this course.

Relationships and Family Strengths

Course Length:	One semester
Grade Level:	11, 12
Prerequisite:	None
Course Credit:	5 credits

Strengthen relationships and experience the dynamic effect it has on the well-being of individuals, families, and society. Students will investigate, communicate, and manage issues in everyday and life-long relationships as a catalyst for personal, family, and societal growth. Students will also explore parenting & family roles and responsibilities. Participation in this course will lead to greater self-awareness, enhanced relationships, improved cultural competencies, strengthened families, confidence in gaining control in choosing direction for one's life, and exposure to the many career opportunities in criminal justice and human services career fields. The big ideas uncovered in this class are personal development, healthy relationships, unhealthy relationships, sexual behaviors & risks, life-long relationships/marriage, family strengths, human services careers, and coping with crises

Advanced Fashion Design Skills

Course Length:	One semester
Grade Level:	9, 10, 11, 12
Prerequisite:	Fashion Design Skills
Course Credit:	5 credits, may re-enroll in this course multiple times.
Cost:	Student is responsible for the purchase of supplies needed for this course.

This course is designed to concentrate and advance your skills, studies, and experiences for fashion and construction after completing the Fashion Design Skills course. Students will work with the teacher to set individual learning plans for advanced levels. If this course matches your talents, passions, and interests, it is also recommended to re-enroll in the Advanced Fashion Design Skills course and enroll in Entrepreneurship.

Advanced Interior Design Skills

Course Length:	One semester
Grade Level:	9, 10, 11, 12
Prerequisite:	Interior Design Skills
Course Credit:	5 credits
Cost:	\$10 consumable fee. Student is responsible for the purchase of additional supplies needed for this course.

This course is designed to concentrate and advance your skills, studies, and experiences for homes and interiors after completing the Interior Design Skills course. Students will work with the teacher to set individual learning plans for advanced levels.

Advanced Culinary Skills

Course Length:	One semester
Grade Level:	10, 11, 12
Prerequisite:	Pass Culinary Skills with a B or above, must have a valid driver's license.
Course Credit:	5 credits
Cost:	\$20 fee (covers cost of food you produce and consume in the food labs)

This course is designed to concentrate your culinary skills, studies, and experiences at advanced levels after completing the Culinary Skills course. Students will work with the teacher to set individual learning plans for advanced levels.

Advanced Child Development Practicum

Course Length:	One semester
Grade Level:	11, 12
Prerequisite:	Pass Child Development with a B or above, must have a valid driver's license.
Course Credit:	10 credits (2 blocked class periods)

How does a community shape the development of a child? Students who enroll in this course should be interested in pursuing a career in early childhood, human services, education, or health sciences that dynamically impacts children. Students will deepen the knowledge of the developmental milestones of K-12th grade children. Students will develop the skills to plan for learning and impact development across all developmental stages, with a strong emphasis on early childhood. Students will complete multiple practicums at *each* of the following: preschool, K-2, 3-5, 6-7, & 9-12 grade as well as shadowing various community programs and professionals that impact child development. Students will work with the FACS teacher to set individual learning plans from these experiences. Most of this course is independent study, with a large responsibility of the learning and planning falling on the student, with the teacher as the facilitator of learning.

Health Sciences

	Career Possibilities:	Recommended WHS high school classes:	
Health Sciences	Nurse	<u>Family & Consumer Sciences</u> Intro to Health Sciences	<u>Agriculture</u> Veterinary Science
	Therapist	Medical Terminology	
	Physician	Nutrition & Food	<u>Business</u> Entrepreneurship
	Surgeon	Child Development	Accounting 2
	Dentist	<u>Science</u> Anatomy	<u>Southeast Community College</u> Health Science Academy
	Dietician	<u>Social Studies</u> Psychology	
	Lab Scientist		
	Health Care Manager		

Intro to Health Sciences

Course Length: One semester
Grade Level: 9, 10, 11, 12
Prerequisite: None
Course Credit: 5 credits

This course is designed to give an overview of the health science career fields including therapeutic, diagnostic, support services, biotechnology & research and health informatics pathways. The course focuses on health careers, exploration, leadership development, basic medical terminology, ethical and legal responsibilities, the history & economics of health care, diseases and disorders, positive and negative health and wellness behaviors, and first aid. Skills learned will be applicable to students continuing in the medical science field.

Medical Terminology

Course Length: One semester
Grade Level: 10, 11, 12
Prerequisite: Intro to Health Sciences (strongly recommended but not required)
Course Credit: 5 credits

This course is designed to help students learn and apply medical terminology by analyzing their components (word roots, prefixes, suffixes or abbreviations). The primary focus is on developing both oral and written skills in the language used to communicate within health care professions. Human anatomy is a key emphasis when learning and applying the medical terms.

Essential Technical Skills

Course Length:	One semester
Grade Level:	9, 10, 11, 12
Prerequisite:	None
Course Credit:	5 credits
Cost:	Students will pay all costs of personal projects <ul style="list-style-type: none">• Cost will vary depending on which project the student selects and current market price of lumber. Typical material cost is \$30-\$50 depending on project selection• Safety glasses are required. We offer a low cost (under \$5) pair of safety glasses that students may purchase from the school. Students may also bring their own, but they will need to remain at school.

This course will study the essential technical skills for independence. Students will explore three key skills that will prepare them for the world of work or being an independent weekend warrior. These skills are car care, product design, and woodworking.

- Basic automobile maintenance and ownership will cover:
 - What is an automobile.
 - How to purchase an automobile and the cost associated with owning an automobile.
 - Basic home maintenance and how to interact with a technician should the need arise.
 - Roadside safety.
- Design skills including drafting, blueprint reading and project planning, using sketching and basic computer aided drafting (C.A.D.) design.
- Woodworking will include:
 - Using and knowing the safety of hand tools, and machines.
 - Students will build a Metric 500 CO2 race car (\$10) and
 - Two of the following: trophy shelf, toolbox, candy machine. (\$20 total)
 - Or an End Table (\$30-\$75, depending on wood type selected)

Furniture Design and Assembly

Course Length:	One semester
Grade Level:	9*, 10, 11, 12
Prerequisite:	Essential Technical Skills is recommended. *Freshman must have taken 8th grade "Woods"
Course Credit:	5 credits
Cost :	Students will pay all costs of personal projects. <ul style="list-style-type: none">• Cost will vary depending on which project the students selects and current market price of lumber. Typical material costs \$80-\$300 depending on project selection.• Safety glasses are required. We offer a low cost (under \$5) pair of safety glasses that students may purchase from the school. Or students may bring their own that need to remain at school.

Students will study the manufacturing process by exploring project design and estimation techniques, wood joinery, assembly, surface preparation, and finishing. Students will develop advanced woodworking skills and learn the safety of power hand tools and machines. These techniques will be used to build one preselected project. They will build projects of their own choosing to fill remaining days (usually 1-2 projects).

Note: Students may repeat this class (once – and only once) to concentrate their study on advanced levels. Students will work with the teacher to set individual learning plans for advanced levels.

Introduction to Engineering Design (I.E.D.) 1

Course Length: One semester
Grade Level: 9, 10, 11, 12
Prerequisite: None
Course Credit: 5 credits

Students will be introduced to engineering design. Project Lead the Way (PTLW) Curriculum will guide students in a hands-on course to explore engineering. Students will be introduced to sketching, 3D computer drafting, and explore scientific reasoning skills.

Introduction to Engineering Design (I.E.D.) 2

Course Length: One semester
Grade Level: 9, 10, 11, 12
Prerequisite: Introduction to Engineering Design (I.E.D.) 1
Course Credit: 5 credits

This semester is a continuation of Project Lead the Way (PTLW) curriculum, which will guide students in a hands-on course to explore engineering. Students will be introduced to sketching, 3D computer drafting, and explore scientific reasoning skills.

Residential Design (C.A.D. – Computer Aided Design, Drafting)

Course Length: One semester
Grade Level: 10, 11, 12
Prerequisite: Essential Technical Skills, I.E.D. is recommended.
Course Credit: 5 credits

The student will acquire knowledge of residential design methods, materials, and blueprint reading. The student will design a set of residential house plans to include: floor plans, foundation plans, wall sections, side elevations, and room perspectives. Students will use the computer to design and complete all course requirements.

Note: Students may repeat this class to concentrate their study on advanced levels. Students will work with the teacher to set individual learning plans for advanced levels.

Welding

Course Length: One semester
Grade Level: 10, 11, 12
Prerequisite: None
Course Credit: 5 credits
Cost: \$15 Consumables Fee
Other: Safety glasses, welding helmets, gloves, and pliers are required and provided. Students may purchase their own gloves or safety glasses from the teacher.

Students enrolled in this course study basic welding techniques covered in the areas of TIG, SMAW, GMAW, oxy-acetylene welding and cutting, plasma cutting. Students will study metals only and industry application will be discussed. Academic study through bookwork and research will be incorporated with welding practice. Safety glasses, welding helmets, gloves and pliers are required and provided. Students may purchase their own gloves or safety glasses from the teacher.

Note: Successful completion of this course is required for the acceptance into the Southeast Community College Career Academy.

Introduction to Building Construction

Course Length:	One semester
Grade Level:	10, 11, 12 (Priority to 12 th graders)
Prerequisite:	Furniture Design and Assembly <u>or</u> permission from a counselor.
Course Credit:	5 credits
Cost:	Students will pay all costs of personal projects. <ul style="list-style-type: none">• There is a \$25 fee for the OSHA 10 certification.• Safety glasses are required. We offer a low cost (under \$5) pair of safety glasses that students may purchase from the school. Or students may bring their own that need to remain at school.

Introduction to Building Construction is a class that introduces the student to residential building techniques and practices commonly used in the industry. Students will expand their knowledge of several different areas regarding residential construction including: power machinery used, residential blueprint reading, framing techniques/practices, masonry work, and hand tools. Throughout the course of the class several different projects will be completed including: OSHA 10 certification, a masonry block wall, and mock up framing for walls, floor joists, and roof trusses. Goal setting, journaling, decision-making skills, problem solving skills, and safety will be emphasized.

Construction Technology

Course Length:	One semester (Two Periods)
Grade Level:	11, 12 (Priority to 12 th graders)
Prerequisite:	Introduction to Building Construction or Furniture Design
Course Credit:	10 credits
Cost:	Students will pay all costs of personal projects. <ul style="list-style-type: none">• There is a \$25 fee for the OSHA 10 certification.• Safety glasses are required. We offer a low cost (under \$5) pair of safety glasses that students may purchase from the school. Or students may bring their own that need to remain at school.

This is a skill-oriented course designed for students with an interest in the construction industry. Students will spend 60% of their time in a two-block classroom setting studying construction technology and 40% of their time in a lab setting performing hands-on applications. Students will work in teams as they learn and use the basic techniques and procedures used in the areas of construction technology. Students will also focus on the following course content areas: understand and using terminology (vocabulary), using tools and safety practices, reading drawings, designing small structures, estimating costs, framing, exterior and interior finishing, and roofing. Students will take an online OSHA 10 course. This course will certify students with an OSHA 10 certification. OSHA certifications are very desirable to employers and will train students on how to be safe in the school shop or job site.

Other

Student Assistant

Course Length:	One or two semesters
Grade Level:	12
Prerequisite:	Administrative approval
Course Credit:	No credit assigned to this opportunity
Capacity:	15 students
Other:	Placement and transportation forms will be provided at the beginning of the semester.

The Student Assistant program is designed for those students who have the desire to assist in various duties throughout the school system. Students will be assigned to the library, office, or activities office during their student assistant period for direct supervision. Staff then have the opportunity to request students on an as-needed basis to assist with various tasks such as activity or athletic set-up, school maintenance, running passes, and classroom and/or clerical tasks. Under special circumstances, students may be asked to assist in other buildings in the district. When students are not requested to assist a staff member, this time may be used as a study hall.

Note: If you have Work Release, you cannot be a Student Assistant.

Work Release

Course Length:	One or two semesters
Grade Level:	12
Prerequisite:	None
Course Credit:	5 credits for 60 hours of confirmed work though verified pay stubs
Transportation:	To be provided by the student
Registration Form:	Waverly High School Work Release Student Agreement

Work Release is an opportunity to give students responsibility to work and earn money while learning about the work world first hand. The work experience will be one that must be accepted by the school. The employer must agree to sign the Student Agreement Form. Students will be released either: one, two, or three hours in the morning or afternoon. All students must attend classes at least four periods per semester.

1) If a senior in the program completes a minimum of 60 work hours (regardless of the number of release periods), that senior will receive a passing grade on his or her transcript and the number of credits pertaining to the number of work hours completed.

2) If a senior in the program does not complete a minimum of 60 work hours (regardless of the number of release periods), that senior will receive one F on his or her transcript.

- 3) 1st Release Period = 5 Credits (MUST complete 60 work hours to receive credit)
2nd Release Period = 5 Credits (Must complete 105 work hours to receive additional credits)
3rd Release Period = 5 Credits (Must complete 135 work hours to receive additional credits)

Note: If you have Work Release, you cannot be a Student Assistant.

English

English 9

Course Length:	Two semesters
Grade Level:	9
Prerequisite:	Required
Course Credit:	10 credits

This is a year-long, introductory English course in which students will develop their reading, writing, speaking, and listening skills in an integrated program of individual, small, and large group work. The focus of the course is reading comprehension and basic writing skills. Students will read and analyze both literary and nonfiction texts with opportunities to craft effective oral and written responses.

Shea, Renee, H. et al. *Foundations of Language and Literature*. Bedford, Freeman, and Worth, 2018.

English 10

Course Length:	Two semesters
Grade Level:	10
Prerequisite:	Required
Course Credit:	10 credits

This is a year-long course in which students will develop their reading, writing, speaking, and listening skills in an integrated program of individual, small, and large group work. One focus of the course is reading analysis where students analyze how authors use different elements of literature to develop themes. The other focus is argumentative essay writing with an emphasis on using strong evidence from a variety of credible sources with accurate MLA citations and a Works Cited.

English 11

Course Length:	Two semesters
Grade Level:	11
Prerequisite:	Required
Course Credit:	10 credits

This is a year-long, required course in which students will develop their reading, writing, speaking, and listening skills in an integrated program of individual, small, and large group work. This course is designed to acquaint students with American literature, with an emphasis on independent note-taking, student-led discussion, analysis in written form, and identifying literary elements. Study of the selected literature will be organized around dominant cultural, historical, and social themes.

English 12

Course Length: One semester
Grade Level: 12
Prerequisite: None
Course Credit: 5 credits

Reading and Writing for the Real World. This course is designed to prepare students for post-secondary educational and professional endeavors. Students will explore potential post-graduation opportunities and engage contemporary issues through research, analysis, and argumentation. Students will engage topics through oral, written, and electronic modes of communication.

World Literature

Course Length: One semester
Grade Level: 11, 12
Prerequisite: None
Course Credit: 5 credits

This course is designed to promote an understanding of a diverse range of literary works in their cultural/historical contexts and of the enduring universal questions of life which unite these literary traditions. Coursework includes the reading of multiple short-story length texts and one play (read in class). Assignments consist of annotations, socratic seminars with reflections, a group presentation, and a debate.

Creative Writing

Course Length: One semester
Grade Level: 11, 12
Course Credit: 5 credits

Creative Writing is a workshop-based writing class in which students are exposed to and experiment with various genres of creative-based writing and also work to develop their own voice. To this end, students will read and respond analytically to mentor texts in a variety of genres (including a wide variety of poetry, fiction, and creative non-fiction). They will also be expected to attempt different writing styles and to engage in opportunities to give and receive meaningful feedback. This course is specifically designed for the proficient and enthusiastic writer.

College English 12

Course Length:	Two semesters
Grade Level:	12
Prerequisite:	Earning a B average in English 11
Course Credit:	10 credits high school credit (3 hours College Credit Option)**

Special Note: Students enrolled in a college-level course will NOT be able to drop the course at the beginning of either 1st or 2nd semester. Students are expected to complete daily assignments on time. Late work is not accepted.

This college-level course provides students with extended practice in writing and rhetoric as inquiry and argument in a supportive, student-centered environment. Particular attention will be given to the role of revision in the writing process. In addition to this study of rhetoric and composition, students will identify and investigate contemporary social issues that are meaningful in students' lives or communities, analyze college-bound literature, learn challenging vocabulary, and increase their proficiency in English grammar and conventions.

****College Credit Option:** College English 12 provides students the option of enrolling in the Nebraska Wesleyan University Honors Academy in order to receive both high school and college credit. Students who dual enroll will be granted 3 credits for ENGLISH 1010 by Nebraska Wesleyan following the successful completion of both semesters of College English 12. Students interested in the option will be able to register and pay the approximate \$285 tuition for the Honors Academy by the first week in October.

Fine Arts

Spanish 1-2

Course Length:	Two semesters
Grade Level:	9, 10, 11, 12
Prerequisite:	None
Course Credit:	10 credits

This is the foundation course in learning Spanish as a second language. The student begins to develop the skills of listening, speaking, reading and writing in Spanish. Vocabulary and rules of the language are studied. The cultures of Spanish-speaking countries and individuals are also embedded in the curriculum.

Note: Student must receive a B or higher each semester of Spanish 1, Spanish 2, Spanish 3 and Spanish 4 to continue to Spanish 5/6 and beyond.

Spanish 3-4

Course Length:	Two semesters
Grade Level:	10, 11, 12
Prerequisite:	Spanish 1-2
Course Credit:	10 credits

Spanish 3-4 continues the development of listening, speaking, reading and writing in Spanish. Use of Spanish in functional situations expands the student's understanding of vocabulary, grammar concepts, and the cultures of Spanish-speaking countries and individuals.

Note: Student must receive a B or higher each semester of Spanish 1, Spanish 2, Spanish 3 and Spanish 4 to continue to Spanish 5-6 and beyond.

Spanish 5-6

Course Length:	Two semesters
Grade Level:	11, 12
Prerequisite:	Spanish 3-4
Course Credit:	10 credits

Spanish 5-6 continues the development of listening, speaking, reading and writing skills in Spanish at the early to mid-intermediate level. Students will continue to develop and hone their basic interpersonal communication skills in Spanish by engaging in various meaning-based communicative activities, while beginning to build their cognitive academic language proficiency. The course will be centered around the study of comprehensible novels which gradually increase in challenge level, are embedded with broadened lexicon, and expose students to increased complexity of linguistic structures in Spanish. Discussion of cultural themes within the novels will aid students in developing increasing intercultural competence.

Note: Student must receive a B or higher each semester of Spanish 1, Spanish 2, Spanish 3, and Spanish 4 to continue to Spanish 5-6 and beyond.

Spanish 7-8

Course Length:	Two semesters
Grade Level:	11, 12
Prerequisite:	Spanish 5-6
Course Credit:	10 credits

Spanish 7-8 continues the development of listening, speaking, reading and writing skills in Spanish at the mid-intermediate to advanced level. Students will continue to develop cognitive academic language proficiency as they engage in meaning-based communicative activities in a wide variety of content-based thematic and cultural topics. Students will focus on developing, expanding and refining their academic writing and speaking skills through advanced writing and discussion activities. Students will continue to develop and expand their lexicon and facility with advanced linguistic structures, as well as continue to build advanced intercultural competence, through the study of short fiction and novels.

Note: Student must receive a B or higher each semester of Spanish 1, Spanish 2, Spanish 3, Spanish 4, Spanish 5, and Spanish 6 to continue to Spanish 7-8.

9th Grade Band

Course Length:	Two semesters
Grade Level:	9
Prerequisite:	By audition or director permission
Course Credit:	10 credits
Cost:	A \$25 per semester fee will apply to any band student using a school-owned musical instrument

9th Grade Band will provide students with an opportunity for continued development of musical fundamentals and a wide variety of musical literature and studies. Students will be required to participate in band performances. Band performances will include concerts, solo and ensemble festivals, marching experiences, and pep band.

Waverly Singers

Course Length:	One or two semesters
Grade Level:	9, 10, 11, 12
Prerequisite:	None
Course Credit:	5 or 10 credits

Waverly Singers is an advanced choral ensemble for ALL VOICES. Waverly Singers studies a variety of musical styles. Students will be expected to rehearse and perform using an advanced level of musicianship and self-discipline and will grow in their musical knowledge of sight-singing, solfege, vocal technique, and choral singing. Required evening concerts will be given throughout the year including fall, Holiday, Spring, and Large Group District Adjudicated events in April, as well as community performances. Students will also have the opportunity to participate in District Solo and Ensemble Adjudicated Events.

Varsity Band

Course Length:	Two semesters, students will also be required to attend 7:30 AM marching and sectional band rehearsals
Grade Level:	10, 11, 12
Prerequisite:	By audition or director permission
Course Credit:	10 credits
Cost:	Marching Band Camp Fees. A \$25 per semester fee will apply to any band student using a school-owned musical instrument

Varsity Band provides students an opportunity for continued development of music fundamentals and the study of a wide variety of musical literature and musical studies with emphasis on performance activities. Students will be required to participate in the band performances and activities in the areas of Marching Band, Concert Band, and Pep Band. Solos/small groups and jazz band are auditioned for and optional.

Students will also be required to attend 7:30 AM marching and sectional band rehearsals during marching season first semester. Students can only do one semester if it is a direct conflict with fulfilling a graduation requirement or there are no other options (proof by the counselors) in a conflict with another class.

A student must be in both semesters of varsity band to be eligible for jazz band participation, solo/small groups, and pep band.

Theatre

Course Length:	One semester
Grade Level:	9, 10, 11, 12
Prerequisite:	None
Course Credit:	5 credits

Theatre is a performing arts class designed to immerse students in the history, language, physical space, literature, writing, marketing, interpretation, technology, creative design, collaboration, physical movement, and vocal expression that is theatre. In this class, students will be exposed to all facets of the theatre and have the opportunity to delve into areas of their highest interest with the end result being a collaborative production.

Note: Students may take this class a second time if they received a B or higher the first time. Repeat students will have adjusted assignments and more opportunity to demonstrate leadership and hone individual skills.

Introduction to Art

Course Length:	One semester
Grade Level:	9, 10, 11, 12
Prerequisite:	None
Course Credit:	5 credits
Cost:	\$10 consumable fee

Want to try something new? This introductory class will explore all methods of artmaking including sculpting, fiber arts, drawing, printmaking, painting, and ceramics. An emphasis on building creativity will be encouraged through sketching and using the creative process to solve artistic problems. The primary goal of this course is to develop technical skills in a variety of media through process based, guided projects, for students new to the fine arts.

Note: This course cannot be repeated.

Art Exploration: Painting

Course Length:	One semester
Grade Level:	9, 10, 11, 12
Prerequisite:	Introduction to Art or 8 th Grade Art
Course Credit:	5 credits
Cost:	\$20 consumable fee

This class will be dedicated to learning and exploring painting styles and techniques. Each student will explore the various applications of painting, techniques involving, and the use of appropriate art elements that include line, shape, texture, color, and value. Students will also be exposed to a variety of expressive experiences using the principles of design to enhance their own personal awareness. Students will be introduced to watercolor, acrylic and oil paints exploring styles such as expressionism, surrealism, impressionism, realism and abstract art. Students will be responsible to pay for consumable materials.

Note: This course cannot be repeated.

Art Exploration: Sculpting

Course Length:	One semester
Grade Level:	9, 10, 11, 12
Prerequisite:	Introduction to Art or 8 th Grade Art
Course Credit:	5 credits
Cost:	\$20 consumable fee

Explore the various materials used to create sculptures. Each student will be introduced to the theory, techniques, and construction methods of sculpture. Materials such as wire, plaster, paper mache, wood, foam board, and found objects will all be used to construct 3-D forms of art. Emphasis will be placed on the design process and elements of art. Students will be responsible to pay for consumable materials.

Note: This course cannot be repeated.

Art Exploration: Drawing and Printmaking

Course Length:	One semester
Grade Level:	9, 10, 11, 12
Prerequisite:	Introduction to Art or 8 th Grade Art
Course Credit:	5 credits
Cost:	\$20 consumable fee

It all starts and ends with drawing, the foundation every artist needs. Each student will expand upon skills in a two-dimensional framework. Advanced drawing and design techniques will be explored as will printing processes such as block printing. Basic elements of art, and the principles of design, will be incorporated into each area. Emphasis will be on creating a more finished and refined product. Students will be responsible to pay for consumable materials.

Note: This course cannot be repeated.

Art Exploration: Ceramics/Pottery

Course Length:	One semester
Grade Level:	9, 10, 11, 12
Prerequisite:	Introduction to Art or 8 th Grade Art
Course Credit:	5 credits
Cost:	\$20 consumable fee

Learn to create with your hands! This course includes instruction in all hand building techniques including sculpting, pinch, coil, slab, and the pottery wheel. Each student will be introduced to ceramic materials, techniques of pottery construction, surface treatments and glazing, and safe operation of relative tools and equipment. Students will be introduced to clay as an artistic, functional material using elements and principles of design as they relate to pottery. Students will be responsible to pay for consumable materials.

Note: This course cannot be repeated

Advanced Art/Portfolio Development

Course Length:	One semester
Grade Level:	10, 11, 12
Prerequisite:	Introduction to Art, and at least 1 of the following; Drawing & Printmaking, Sculpture, Painting, Ceramics, OR Teacher/Counselor Approval
Course Credit:	5 credits
Cost:	\$20 consumable fee

Do you love art? Have you taken all of the art courses offered at WHS and are considering continuing in the fine arts after high school? Then this course is for you! This independent study will be tailored to student interests. Students in advanced art will develop a professional digital portfolio, prepare artist statements and commit to completing larger, more detailed works of art in their chosen medium. Advanced art will include opportunities to work on scholarships, tips for photographing and presenting your artwork (including matting, framing, and constructing canvases) and help you make connections to working artists in our community. You will develop a body of work that showcases your personal style and visual voice.

Math

Differentiated Geometry

Course Length:	Two semesters
Grade Level:	8, 9, 10
Prerequisite:	Algebra 1-2 (with a strong academic performance both semesters with a grade of A earned both Semesters) MAP score and/or teacher recommendation will be considered.
Course Credit:	10 credits

This differentiated course of geometry explores *additional* topics and investigates topics in *greater* depth and at a much *faster* speed than in the standard course. The differentiated course also includes a more substantial study of algebra, technology, and formal proof throughout the course.

Geometry

Course Length:	Two semesters
Grade Level:	9, 10, 11, 12
Prerequisite:	Algebra 1-2
Course Credit:	10 credits

This introductory Geometry course integrates some formal proof with concept development. Students will study plane figures such as triangles, quadrilaterals, and other polygons through deductive and inductive reasoning. Students will also learn the vocabulary, notations, and properties used to describe one, two, and three-dimensional objects as well as study ratios, proportions, and right triangle trigonometry. Emphasis will be placed on spatial visualization, algebra-geometry relationships, technology, and proofs.

Pre-Algebra

Course Length:	Two semesters
Grade Level:	9
Prerequisite:	REQUIRES teacher/counselor recommendation; MAP score will be considered
Course Credit:	10 credits

This course builds on a students' understanding of basic math concepts covered in middle school and helps provide a necessary foundation for success in Algebra 1-2.

Algebra 1-2

Course Length:	Two semesters
Grade Level:	9, 10, 11, 12
Prerequisite:	None
Course Credit:	10 credits

This course uses students' understanding of basic math concepts to develop algebraic concepts and skills to provide a necessary foundation for success in future studies in mathematics. A successful foundation is achieved through learning to write, solve, and graph linear and exponential equations, solving systems of linear equations, and modeling real-life linear and exponential functions. Students will learn the notations and symbolic representations that will be further developed in later mathematics courses.

Algebra 3-4

Course Length:	Two semesters
Grade Level:	9, 10, 11, 12
Prerequisite:	Algebra 1-2 and Geometry/Differentiated Geometry
Course Credit:	10 credits

Algebra 3-4 is essential for most colleges and many vocational programs. This course builds upon student mastery of algebraic expressions and forms by reemphasizing solutions and graphs of linear functions from Algebra 1-2 and expanding to solutions and graphs of quadratics, powers and roots, and functions based upon these concepts. Students study logarithmic, trigonometric, polynomial and other special functions, learning of their abstract properties and of their uses as tools for modeling real-world situations. Students will also deepen their understanding of probability as well as learn how to use graphing calculators and other technologies. Algebra 3-4 also places emphasis on ACT preparation.

Advanced Algebra 3-4

Course Length:	Two semesters
Grade Level:	9, 10, 11, 12
Prerequisite:	Algebra 1-2 and Geometry/Differentiated Geometry; algebra placement test
Course Credit:	10 credits

Advanced Algebra 3-4 offers an alternative to Algebra 3-4 for students looking to challenge their mathematical abilities and pursue careers and programs of study in math and science. The curriculum consists of traditional Algebra 3-4 concepts plus foundational topics from precalculus. These latter topics could include functions built from high-order polynomials, rational expressions, logarithms, and trigonometry. Across all of these topics, the curriculum will require students to solve complex problems and then apply, analyze, and evaluate the results. Three factors differentiate Advanced Algebra 3-4 from Algebra 3-4: faster pace, increased content volume, and higher expectations for attaining depth of knowledge. To qualify for Advanced Algebra 3-4, a student must have demonstrated a strong Algebra 1-2 performance, a teacher recommendation and qualifying scores on the NWEA MAP Growth assessments and on algebra placement test (to be administered during Geometry or Diff Geometry fall semester exam).

Pre-Calculus

Course Length: Two semesters
Grade Level: 10, 11, 12
Prerequisite: Algebra 3-4 (with a minimum grade of C earned each semester)
Course Credit: 10 credits

Pre-Calculus is designed for those students who intend to continue their study of mathematics in the traditional Calculus sequence. This course involves work with functions and their graphs, including polynomial, rational, logarithmic, and trigonometric functions. Applications use real-life data for analysis. Graphing calculators are used in plotting functions and regression analysis. Units on sequences and series, statistics, and probability are also included. Pre-Calculus also places emphasis on ACT preparation.

Integrated Math

Course Length: Two semesters
Grade Level: 11, 12
Prerequisite: Algebra 1-2 & Geometry; **REQUIRES** teacher recommendation
Course Credit: 10 credits

Integrated Math is intended to provide students with opportunities to strengthen beginning algebra and geometry skills while broadening their understanding of real-world mathematics through discrete math concepts. Students will be able to demonstrate mastery of linear concepts, algebraic expressions, quadratics, polynomials, exponential functions, measures of distance and capacity and be able to explain the relationships within and between geometric figures and polygons using written words and mathematical sentences. They will be introduced to and provided learning experiences in probability and statistics.

Applied Math

Course Length: Two semesters
Grade Level: 12
Prerequisite: Permission from math teacher or counselor required
Course Credit: 10 credits

This course is intended for seniors who learn mathematics best in an applied setting and for students heading toward vocational-technical careers. Algebra and geometry concepts are taught in occupational settings. Students will be involved with making measurements in lab situations, making calculations with the collected data, and discussing the results. Topics in the course come from pre-algebra, algebra, geometry, and consumer math.

Pre-College Math

Course Length: Two semesters
Grade Level: 12
Prerequisite: Permission from math teacher or counselor required
Course Credit: 10 credits

This course is designed to provide students with the skills and knowledge needed to pursue a 2 or 4 year non-math college degree with a goal of building on the foundations of mathematics, preparing students for the rigor of a college level math course. Students will extend their understanding of trigonometry concepts, functional mathematics, and statistical computation throughout the year.

College Statistics

Course Length:	Two semesters
Grade Level:	11, 12
Prerequisite:	Algebra 3-4 (with a minimum grade of B earned both semesters)
Course Credit:	10 credits

Do you have an interest in Business, Psychology, Social Sciences, the Medical Field, or Economics? Are you going to college? If yes, College Statistics may be for you! This course will cover all the statistics that are covered in a college statistics course! The practical application of statistical thinking to contemporary issues; collection and organization of data; probability distributions; statistical inference; estimation; hypothesis testing. A graphing calculator (preferably of the TI-83+ / TI-84+ family) is required.

Interested students can also earn college credit by dual enrolling through SCC and paying for/earning the credit.

SCC requirement: MUST have at least a 23 on the math section of the ACT **OR** a B or higher in Algebra 3-4 both semesters. Contact your college's admissions office regarding how this credit will be accepted for certain programs.

SCC SENCAP / DC Advantage Application needed. (Application forms are available from the counseling office). Mark DC Advantage in the APPLYING FOR area. MATH 2170/BSAD 2170 Applied Statistics 3 credits.

College Calculus

Course Length:	Two semesters
Grade Level:	11, 12
Prerequisite:	Pre-Calculus (with a minimum grade of B earned both semesters)
Course Credit:	10 credits

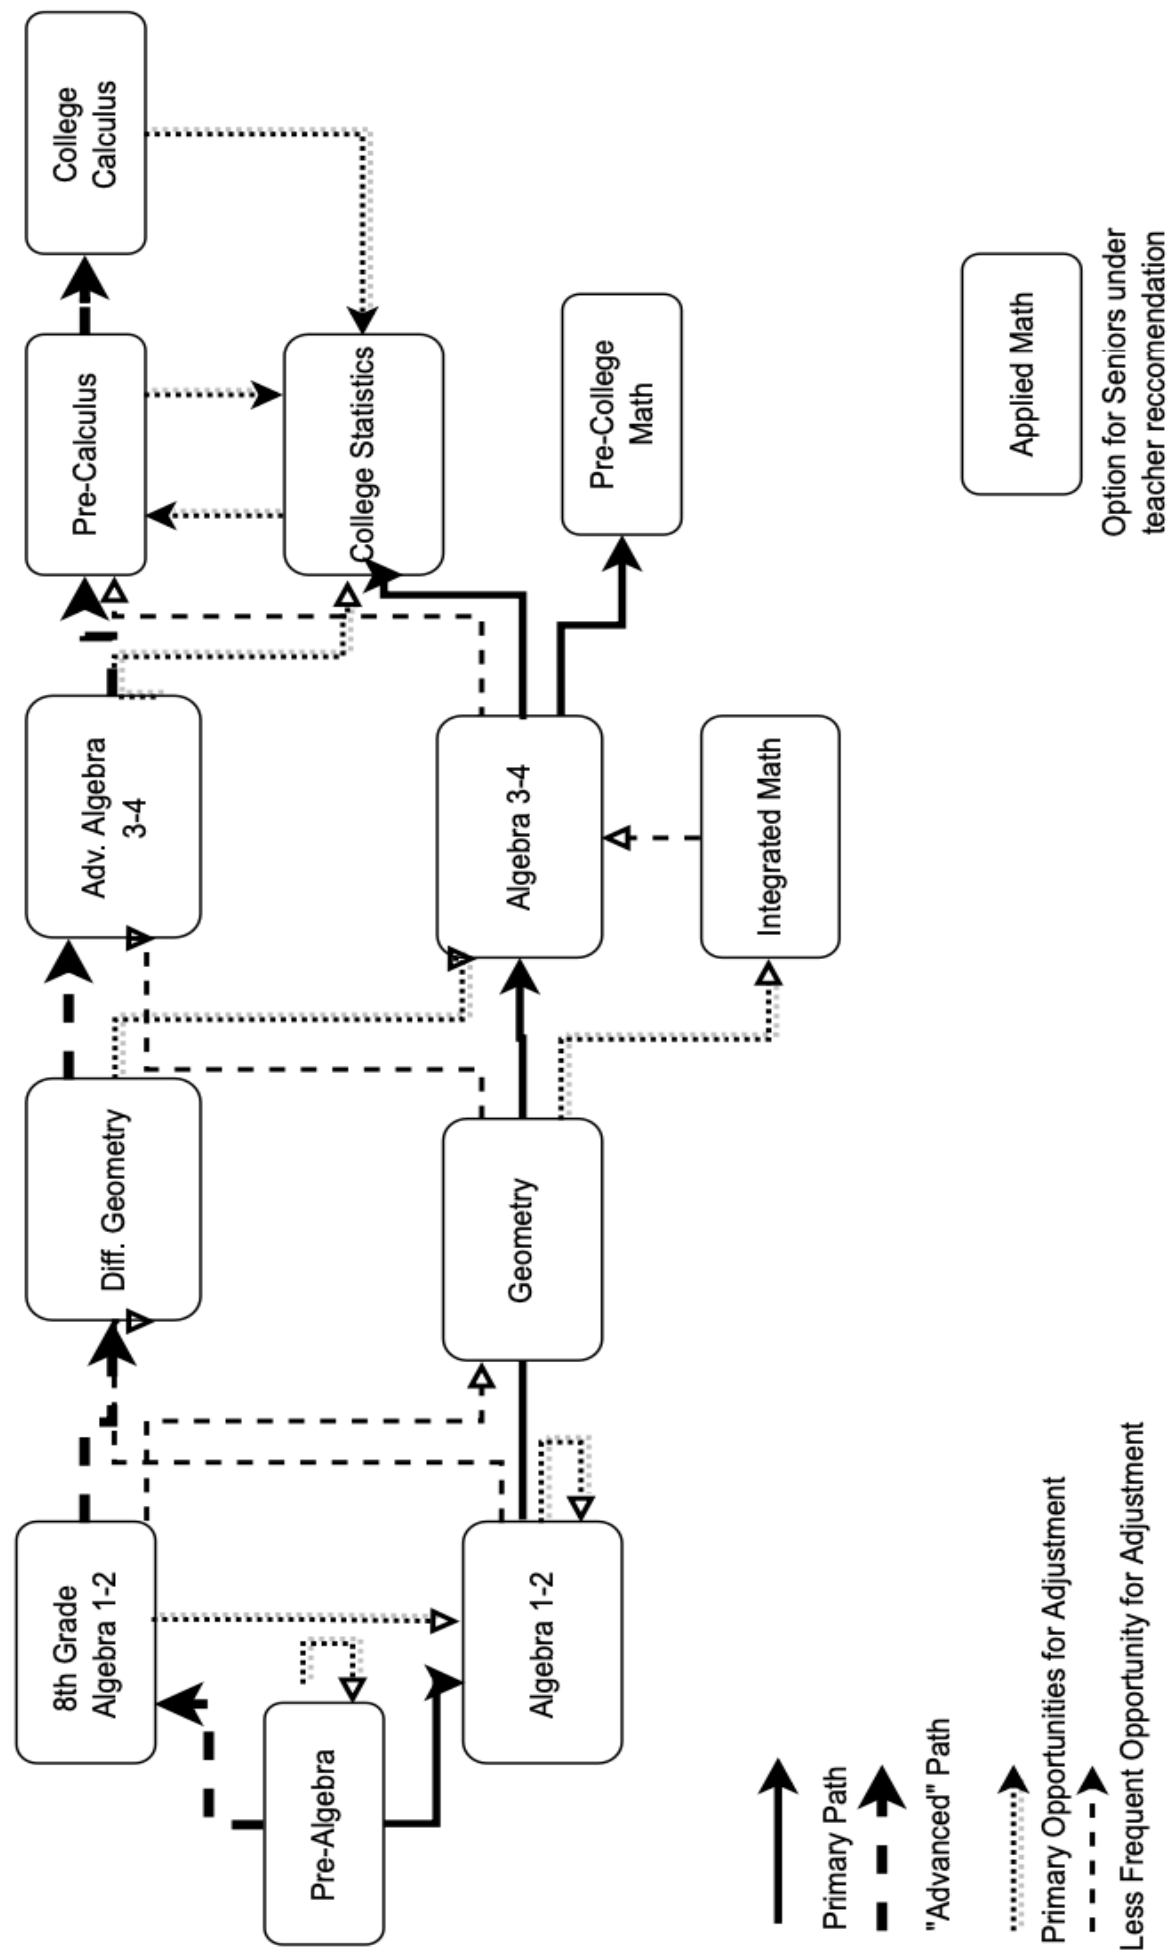

This course is a study of analytical geometry and single variable calculus. Topics include limits, continuity, derivatives, and applications of derivatives, integrals, and application integrals. A graphing calculator (preferably of the TI-83+ / TI-84+ family) is required.

Interested students can also earn college credit by dual enrolling through SCC and paying for/earning the credit.

SCC requirement: MUST have a 28 on the math section of the ACT **OR** a B or higher in pre-calculus. Contact your college's admissions office regarding how this credit will be accepted for certain programs.

SCC SENCAP / DC Advantage Application needed. (Application forms are available from the counseling office). Mark DC Advantage in the APPLYING FOR area. MATH 1600 Analytic Geometry & Calculus 5 credits.

Math Course Placement Flowchart

Physical Education

Note: Only one Physical Education course can be taken per semester.

Health

Course Length:	One semester
Grade Level:	9
Prerequisite:	Required
Course Credit:	5 credits
Fee:	\$15 fee if student would like to be CPR certified to cover cost of the certification card

Health covers the following topics: wellness, nutrition, fitness, stress, drugs and alcohol, tobacco, safety and accident prevention, body systems, first-aid, heart disease and cancer, and infectious diseases. CPR training with a written CPR exam and suicide prevention are taught during this course.

Lifetime Sports

Course Length:	One or two semesters
Grade Level:	10, 11, 12
Prerequisite:	None
Course Credit:	5 or 10 credits

Lifetime Sports is designed to cover the following units: archery, golf, badminton, table tennis, volleyball, and wiffle ball. All units fall under the category of lifetime activities. Each unit is designed to teach skills, techniques, and strategies of the various activities, as well as increasing knowledge and appreciation of the activities.

Fitness For A Healthy Lifestyle

Course Length:	One or two semesters
Grade Level:	10, 11, 12
Prerequisite:	None
Course Credit:	5 or 10 credits

The purpose of this semester course is to introduce students to a variety of components involved in living a healthy lifestyle. This class will be a non-competitive environment, focusing on total body fitness. Students will participate in a variety of physical activities while broadening their knowledge about the benefits of a healthy lifestyle. Some of the activities offered during this course include, but are not limited to: workouts on cardiovascular machines, workout videos, body toning with weights, cross training, and abdominal work-outs.

****A student must take Fitness for a Healthy Lifestyle prior to Strength and Conditioning OR the student must have extensively participated in the before/after school program or the summer program according to the program director, coaches or both.**

Strength and Conditioning

Course Length: One or two semesters
Grade Level: 10, 11, 12
Prerequisite: Fitness for a Healthy Lifestyle
Course Credit: 5 or 10 credits

This is a semester-long class designed to teach proper lifting techniques, improve strength, and increase muscular endurance through a personally designed lifting and conditioning program. Students will also spend class time doing flexibility exercises designed to improve all ranges of joint motion so as to help reduce the likelihood of injuries. Improving agility will be another focus of this class. The overall goal of this class is to develop the proper attitudes that contribute toward an appreciation for strength and conditioning.

****A student must take Fitness for a Healthy Lifestyle prior to Strength and Conditioning **OR** the student must have extensively participated in the before/after school program or the summer program according to the program director, coaches or both.**

Science

Earth/Physical Science

Course Length: Two semesters
Grade Level: 9
Prerequisite: Required
Course Credit: 10 credits

Semester 1: Earth and Space Science is the study of the processes that shape the Earth and explain the universe. This course will explore the branches of Earth Science, which includes the following: geology, meteorology, climate, and astronomy. In this science course, students will learn in detail about the Earth's interior and the theory of plate tectonics, how spheres of the Earth interact with each other, the influence that weather and climate have on the Earth, how Earth has changed over geologic time and lastly looking at the formation of stars and other stellar objects in the universe.

Semester 2: Physical Science is the study of the relationship between matter and energy. This class will provide an introduction to basic physics. Students will learn about Newton's Laws of Motion, Forces, Waves, and Electromagnetic Radiation, and Energy Transfer.

Biology

Course Length: Two semesters
Grade Level: 9, 10 (**9th grade must be concurrently enrolled in Diff Geometry or took the course previously**)
Prerequisite: Required
Course Credit: 10 credits

This course explores the foundation of cellular biology, the relationship between structure and function from molecules to organisms and systems, the interdependence and interactions of biotic and abiotic components of the environment, and mechanisms that lead to changes in populations over time.

Chemistry

Course Length: Two semesters
Grade Level: 10, 11, 12
Prerequisite: A student must have completed, or is currently enrolled in, Algebra 3-4
Course Credit: 10 credits

This course is for students interested in pursuing degrees in STEM (Science, Technology, Engineering, and Mathematics) fields. Topics on methods in measurement, atomic structure, light, energy, periodic law, chemical composition, bonding, nomenclature, chemical reactions, mass to mole relationships, and stoichiometric calculations will be covered. There will be at least one demonstration or lab activity with each chapter designed to use the scientific methods and reinforce topics covered in the text. The student will benefit from this solid course for college preparation plus a clearer understanding of many observable natural occurrences, involving such things as boiling and melting points, energies absorbed or produced in chemical reactions and logical solutions to problem solving.

Note: A student must take Chemistry OR Advanced Physical Science to meet graduation requirements.

Anatomy and Physiology

Course Length: Two semesters
Grade Level: 11, 12
Prerequisite: Biology
Course Credit: 10 credits

Anatomy and Physiology focuses on the structure and function of the human body. The curriculum in this course provides a challenging opportunity for students who are interested in a career in the medical profession by focusing on the human body systems. This course uses clinical applications, dissections, and lab activities to enrich the curriculum.

Note: Students may take anatomy & physiology concurrently with chemistry or advanced physical science.

Physics

Course Length: Two semesters
Grade Level: 11, 12
Prerequisite: Algebra 3-4
Course Credit: 10 credits

Physics is the study of the fundamental rules of the Universe. We will study motion, the make up and behavior of different forms of matter, waves, and the behavior of electrons. Many of the examples and experiments will explain phenomena found in everyday life. This course is highly recommended for students planning to enter a medical, science, or engineering field of study in college.

Note: Students may take physics concurrently with chemistry or advanced physical science.

Advanced Physical Science

Course Length: Two semesters
Grade Level: 10, 11, 12
Prerequisite: Earth/Physical Science
Course Credit: 10 credits

Advanced Physical Science is the study of matter and energy and includes basic chemistry. Labs or investigations are used to give students hands-on learning and practical applications to interact with the material. Topics that will be studied include matter, the periodic table, elements, mixtures, compounds, chemical reactions, light and electromagnetic spectrum, energy, and heat.

Note: A student must take Chemistry OR Advanced Physical Science to meet graduation requirements.

Advanced Placement Biology

Course Length: Two semesters

Grade Level: 11, 12

Prerequisite: Biology

Course Credit: 10 hours

Other: AP Exam – Approximate student expense \$100 examination fee. Please visit the College Board Website at <http://apcentral.collegeboard.com> for more information.

AP Biology is a rigorous and demanding course, which is the equivalent of an introductory college biology course. Content will be covered in more depth and greater expectations will be placed on interpretation and analysis of information than previous biology courses. In addition, statistical analysis of data and modeling of concepts will be expected. A significant amount of studying must be completed at home to allow time for discussion, labs, and inquiry during class time. The AP Biology curriculum encompasses 4 “big ideas” with Essential Knowledge and Process Skills that support each one.

Big Idea 1: Evolution – the process of evolution drives the diversity and unity of life.

Big Idea 2: Cellular Processes (Energy and Communication) – Biological systems utilize free energy and molecular building blocks to grow.

Big Idea 3: Genetics and Information Transfer – living systems store, retrieve, transmit, and respond to information essential to life processes.

Big Idea 4: Interactions – Biological systems interact and these systems and their interactions possess complex properties.

Note: Students may take AP biology concurrently with chemistry or advanced physical science.

Advanced Chemistry

Course Length: Two semesters

Grade Level: 11, 12

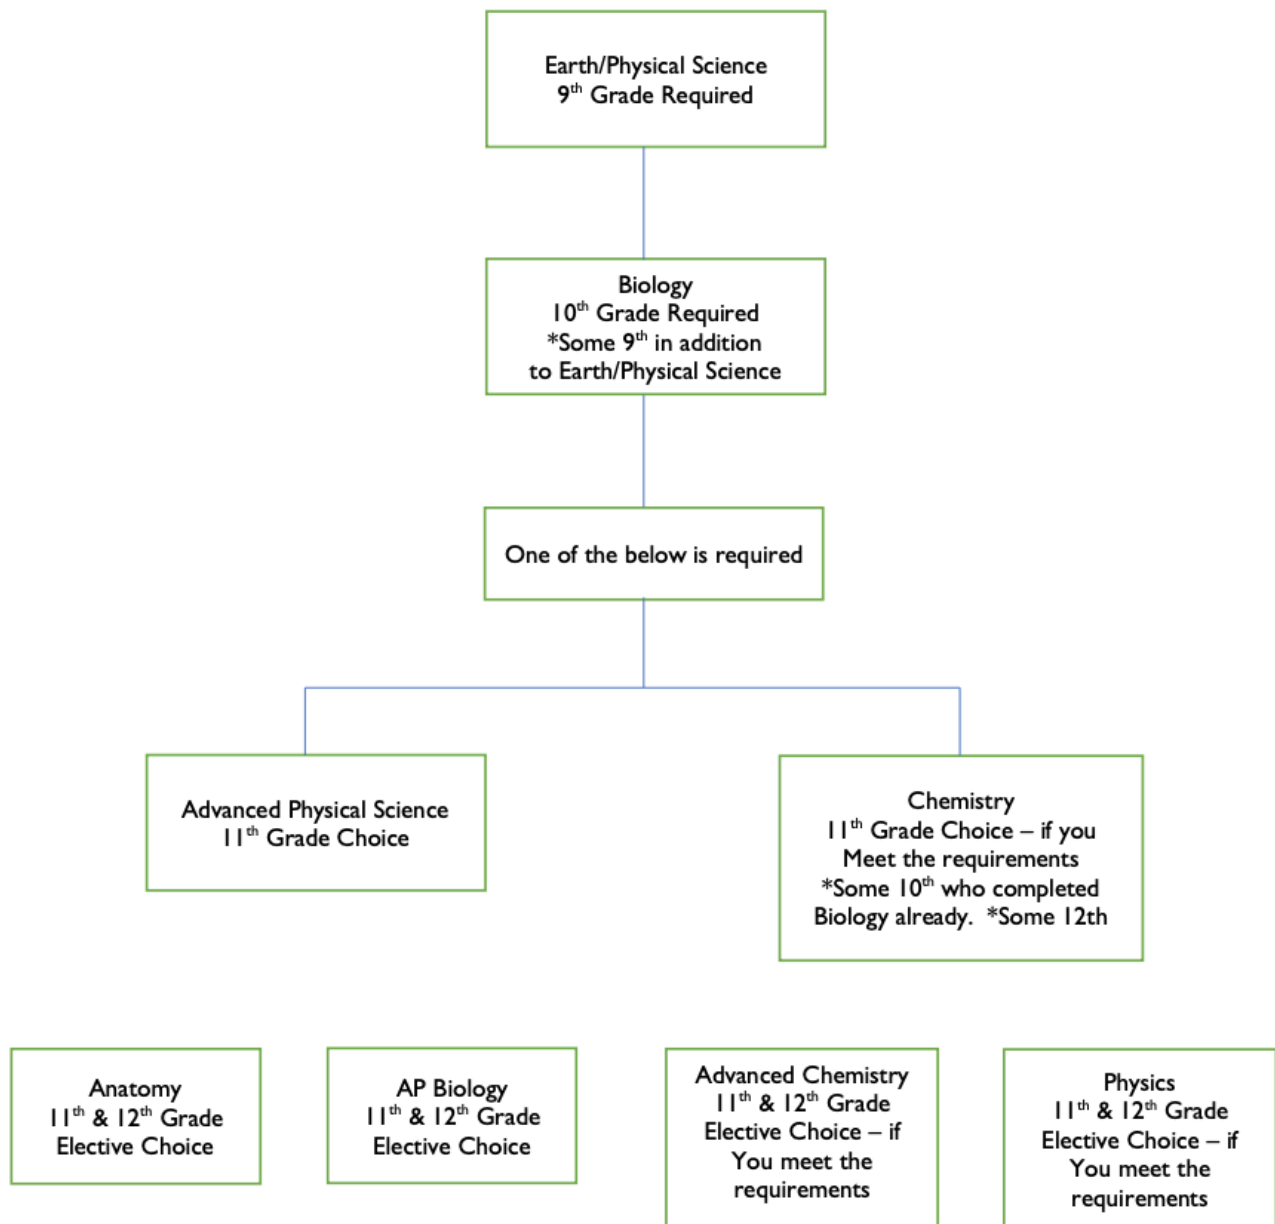

Prerequisite: Chemistry with a C or higher. Must be currently enrolled in Pre-Calculus or College Statistics **or** have passed Pre-Calculus or College Statistics to take Advanced Chemistry.

Course Credit: 10 credits

This second-year chemistry course is designed to explore new topics and extend on previous knowledge of chemistry. Topics will include quantum theory and atomic structure, stoichiometry, chemical reactions, gasses, thermochemistry, bonding, shapes of molecules, intermolecular forces, and properties of crystalline solids. Students are expected to exhibit good study skills and will be required to complete lab reports, homework assignments, and perform successfully on exams. This course builds upon students’ previous knowledge in preparation for the first-year college chemistry course. This course is recommended for students wishing to pursue medical careers or planning a college major in Chemistry, Biology, Biochemistry, Physics, or Engineering.

3 YEARS ARE REQUIRED FOR GRADUATION, TO INCLUDE:

- 1) Earth/Physical Science
- 2) Biology
- 3) Chemistry OR Advanced Physical Science

Social Studies

United States History

Course Length: Two semesters
Grade Level: 9, 10, 11, 12
Prerequisite: Required
Course Credit: 10 credits

This course studies United States History from the 1870's through the early 21st Century. The course is centered around seven central frameworks (themes): Civic Ideals & Practices, Power & Authority, Innovation & Change, Economics, Conflict & Consequence, Beliefs & Culture, and Geography.

World History

Course Length: Two Semesters
Grade Level: 10, 11, 12
Prerequisite: Required
Course Credit: 10 credits

World History (prehistory to present era) is centered around seven central frameworks (themes): Civic Ideals & Practices, Power & Authority, Innovation & Change, Economics, Conflict & Consequence, Beliefs & Culture, and Geography.

World Geography and Cultures

Course Length: One Semester
Grade Level: 10, 11, 12
Prerequisite: None
Course Credit: 5 credits

Students will use the tools of geography to view, analyze, and interpret events in their surroundings and throughout the world. Students will also examine people, places, and societies of the contemporary world through the lens of geography, history, and culture. In-depth lessons make students feel like they actually had their passports stamped in a tour of countries across Europe, Africa, Asia, and the Americas.

Psychology

Course Length: One semester
Grade Level: 10, 11, 12
Prerequisite: None
Course Credit: 5 credits

Psychology is the scientific study of the human mind and its functions, especially those affecting behavior. The purpose of this course is to establish a basic foundation in psychology. The study of psychology is evident in all aspects of our lives from how we remember items in school to how stress affects our health. Through experimentation, research, collaboration, and direct instruction you will learn the following elements in the study of psychology: personality, human development, the brain, consciousness, sensation/perception and psychological disorders.

Constitution and Citizenship

Course Length: One semester
Grade Level: 12
Prerequisite: Required
Course Credit: 5 credits

This course includes a survey of federalism based on local and national government. The class will explain the evolution of the Federal Constitution. A variety of textbooks, reading material, films, and class projects will be utilized.

Microeconomic Principles

Course Length: One semester
Grade Level: 10, 11, 12
Prerequisite: None
Course Credit: 5 credits

The purpose of microeconomics is to give students a thorough understanding of the principles of economics that apply to the functions of individual decision makers, both consumers and producers, within an economic system. It places primary emphasis on the nature and functions of product markets and includes the study of market factors and the role of government in promoting greater efficiency and equity in the economy.

Throughout this course, you will experience cross-curricular activities: the scientific method, graphing, ratios, reports, monetary figures, other statistics comparisons, data creation and analysis. All this in the name of economic study and understanding.

****College Credit Option:** Microeconomic Principles provides students the option of enrolling in the Nebraska Wesleyan University Honors Academy in order to receive both high school and college credit. Students who dual enroll will be granted 3 credits for ECON 1540 by Nebraska Wesleyan following the successful completion of one semester of Microeconomic Principles. Students interested in this option will be able to register and to pay the approximate \$285 tuition for the Honors Academy at the onset of the course.

****Any sophomore taking this course CANNOT receive dual-credit through the Nebraska Wesleyan Honors Academy. Only high school juniors and seniors are eligible for the college credit option.**

Macroeconomic Principles

Course Length:	One semester
Grade Level:	10, 11, 12
Prerequisite:	None
Course Credit:	5 credits

The purpose of macroeconomics is to give students a thorough understanding of the principles of economics that apply to the economic system as a whole. The course places particular emphasis on the study of national income and price-level determination and also develops students' familiarity with economic performance measures, the financial sector, stabilization policies, economic growth, and international economics.

Throughout this course, you will experience cross-curricular activities: the scientific method, graphing, ratios, reports, monetary figures, other statistics comparisons, data creation and analysis. All this in the name of economic study and understanding.

****College Credit Option:** Macroeconomic Principles provides students the option of enrolling in the Nebraska Wesleyan University Honors Academy in order to receive both high school and college credit. Students who dual enroll will be granted 3 credits for ECON 1530 by Nebraska Wesleyan following the successful completion of one semester of Macroeconomic Principles. Students interested in this option will be able to register and to pay the approximate \$285 tuition for the Honors Academy at the onset of the course.

****Any sophomore taking this course CANNOT receive dual-credit through the Nebraska Wesleyan Honors Academy.** Only high school juniors and seniors are eligible for the college credit option.

College U.S. History

Course Length:	Two semesters
Grade Level:	11, 12
Prerequisite:	Successful completion of previous social studies courses
Course Credit:	10 credits

This is an advanced course for college bound students in grades 11 and 12. Students will study the major events and interpretive questions from U.S. History at an accelerated pace. Students will learn to take notes from printed materials, lectures, and discussions, as well as write analytical essays. This course is modeled after a full-year college course in United States History on the period from the first European explorations of the Americas to the modern era (circa the 1980's). Topics will cover political institutions and behavior, public policy, social and economic change, diplomacy and international relations, and cultural and intellectual developments.

****College Credit Option:** There is an option for dual credit through Nebraska Wesleyan University. The enrollment deadline is the first Friday of October for 8 hours of credit (Currently, the cost per credit hour is \$88). First semester is History 1010 (Topics in U.S. History to 1877) and second semester is History 1020 (United States Society and Culture Since 1877). Students that enroll for dual credit are registered for both semesters for 8 hours of credit. More information about the dual credit option can be accessed at <https://sites.google.com/district145.org/dan-jensen-whs/aphist/honors-academy>

Special Education

Communications

Course Length: One semester
Grade Level: 9, 10, 11, 12
Course Credit: 5 credits

Discover & deepen your knowledge and skills necessary for gaining appropriate communication skills. This course will help improve social skills and social interactions among teens and will support the growth and goals of each student's IEP. Students will focus on skills related to making and keeping friends, and managing peer conflict and rejection. Students will work through lessons with concrete rules and steps, be responsible for homework assignments, and participate in unique, fun activities to ensure that teens are comfortable incorporating what they've learned. The following are the key focuses uncovered in this course:

- Trading Information, Two-Way Conversations and Electronic Communication
- Choosing Appropriate Friends
- Appropriate Use of Humor
- Starting, Joining and Exiting Conversations
- Good Sportsmanship
- Get-Togethers
- Handling Arguments
- Changing Reputations
- Handling Teasing and Embarrassing Feedback
- Handling Physical and Cyber Bullying
- Minimizing Rumors and Gossip

English Foundations

Course Length: Two semesters
Grade Level: 9, 10, 11, 12
Prerequisite: Must be identified **and** have permission of counselor and case manager
Course Credit: 10 credits

This course provides a skills-based approach to reading and writing for students with special needs. Students will gain basic reading and writing skills that are prerequisite skills for success throughout their lives. Skill development will be facilitated according to individual needs. Areas of focus will include reading accuracy, fluency, and generalization; sentence structure preparation and design; graphic organization; and strategy use. English Foundations will help students increase their appropriate use of vocabulary and standard English conventions for sentence structure, usage, punctuation, capitalization, and spelling. Students will be able to gain an appreciation and enjoyment of English. It will replace the English 9, English 10 and/or English 11 graduation requirement, based on the student's year in school. Students may take English Foundations all four years if that is the appropriate placement for the student.

Math Foundations

Course Length: Two semesters
Grade Level: 9, 10, 11, 12
Prerequisite: Must be identified **and** have permission of counselor and case manager
Course Credit: 10 credits

Math Foundations is a math course for students who need to improve or polish their basic math skills that are prerequisite skills for success throughout their lives. Skill development will be facilitated according to individual needs. Areas of focus will include the following: improve skills in the basic operations, use knowledge of basic math skills and apply them to “real-life” situations (checks, budgeting, sales tax, discounts), learn how to properly use a calculator, learn to interpret simple graphs and tables, learn to read, use and convert simple measurement tools, and learn basic algebra and geometry concepts.

Reading

Course Length: One or two semesters
Grade Level: 9, 10, 11, 12
Prerequisite: Must be identified **and** have permission of counselor and case manager
Course Credit: 5 credits

This course will provide direct instruction for strategies in reading comprehension, reading decoding, reading fluency, writing, and expressive/receptive language. Students will be provided instruction in multiple ways. The course will be tailored to meet individual needs. Reading and writing concepts and materials from general education classes may be incorporated as a means of connecting concepts between disciplines. Students will develop personal goals and self-monitor their progress to access what they are learning.

Advanced Communications

Course Length: One semester
Grade Level: 9, 10, 11, 12
Prerequisite: Communications
Course Credit: 5 credits

Discover and deepen your knowledge and skills necessary for gaining, maintaining, and interpreting communications. This course will improve social skills and social interactions among teens, between teens and adults, and between teens and employers to support the growth and goals of each student’s IEP. Students will focus on skills related to managing peer conflict and rejection, self-advocacy, and interpreting figurative language in conversation and communications. Students will work through lessons with concrete rules and steps, be responsible for homework assignments, and participate in unique, fun activities to ensure that teens are comfortable incorporating what they’ve learned. The following are key focus areas covered in this course:

- Trading information and starting conversations
- Trading information and maintaining conversations
- Finding a source of friends
- Electronic communication
- Appropriate use of humor
- Entering group conversations
- Exiting conversations
- Get-togethers
- Dating Etiquette--Do’s and Don’ts
- Handling Disagreements
- Handling direct and indirect bullying
- Work-related communication and conversation
- Code-Switching

Text: PEERS for Young Adults--Social Skills Training for Adults with Autism Spectrum Disorder and other Social Challenges. Laugeson, Elizabeth A. 2017.

Study Skills

Course Length:	Two semesters
Grade Level:	9, 10, 11, 12
Prerequisite:	Must be identified <u>and</u> have permission of counselor and case manager
Course Credit:	10 credits

Study Skills classes are available to those students who are identified for resource assistance. Students will be required and expected to bring and work on assignments from general education classes as well as complete weekly vocational, learning, self- advocacy and strategy activities. Assistance will be provided by resource teacher(s) and paraeducator(s) in order to strengthen academics and other skill areas.

Life Skills

Course Length:	Two semesters
Grade Level:	10, 11, 12
Prerequisite:	Must be identified <u>and</u> have permission of counselor and case manager
Course Credit:	10 credits

The Life Skills course was created to establish a basic foundation for student independence by introducing living skills, social skills, career exploration, recreation, and leisure activities that will increase and improve the student's quality of life.

Work Experience (Beginning Level)

Course Length:	Two semesters
Grade Level:	10, 11, 12
Prerequisite:	Must be identified <u>and</u> have permission of counselor and case manager
Course Credit:	Varies

Student will be provided a non-paid work opportunity at a work site(s) within the district or community during the school day. Student will have regular coaching or support as needed. Staff will monitor and evaluate work site performance and growth throughout. In addition to the work site experience, students will explore different types of careers through shadowing, tours, and research. Students will be exposed to resume writing, interviewing skills, and various workplace concepts within a classroom setting. Student will reflect upon and communicate personal growth in the skill outcome areas throughout the duration of the course.

- **Dependence Level of Student:** Co-dependent
- **Work Site Frequency and Duration:** 1-3 Days/week, 1-2 periods
- **Prerequisite Skills:** Must be identified with an Individual Education Plan (IEP), Willingness to learn about careers, vocational skills, and seek employment.
- **Skill Outcomes:** Basic Vocational Skills, Basic Interpersonal Skills, Self-Awareness, Self Regulation, Self Efficacy, Self Advocacy, Goal Setting/Attainment

Work Experience (Developing Level)

Course Length: Two semesters

Grade Level: 10, 11, 12

Prerequisite: Must be identified **and** have permission of counselor and case manager

Course Credit: Varies

Student will be provided a non-paid work opportunity at a work site(s) in the community during the school day. Student will have consistent coaching or support as needed.
