

New car rider procedure for drivers

We are reworking how we ask parents to line up to pick up students in the car rider line to alleviate the traffic backup on Sheek Road.

- Please continue to enter the lot from the north parking lot entrance.
- Proceed around the parking lot.
- When the line reaches the primary playground, please enter the playground and line up around the perimeter.
- Once the lot is full, please line up in a single line until becoming parallel with Sheek Road. (No additional cars will turn in to the lot due to cars exiting. It will be too tight for a car to enter while another is exiting.)
- When cars are lining up on the west side of the parking lot, please form a double line.
- When the line starts moving, alternate back and forth into a single line at the curve heading towards the main entrance.

We have tried this procedure the last couple of days. It has helped tremendously with keeping the traffic moving on Sheek Road. It also seems to make it safer for cars turning out of the lot. Thank you for your feedback and patience as we try to make car rider pick-up efficient and safe.
