

Isaac Young Middle School Summer Math Assignment

Rising 6, 7, 8 grade students

Students have access to the iReady platform which they have used this school year. The platform can be accessed using [classlink](#) This is available to all rising 7th, 8th, and 9th-grade students. They can continue to use their log in from SY21-22. My path gives students opportunities to access personalized instruction at their own level ensuring they are supported and challenged to grow as mathematicians.

Additionally students can use [IXL](#) which is a computer-based program that allows students to develop math skills by completing a series of lessons. Teachers and administrators can check to see each student's progress. This summer assignment is optional but we hope that every student takes advantage of the opportunity to strengthen their math skills and prepare for the 2022-2023 school year.

Rising Algebra and Geometry Students

Deadline: 9/12/22 (8:00 a.m.)

Directions:

- Select the course registration link for the course that you are going into NEXT school year (2022-23), from the menu on the right. You should select the course you are taking next school year.
- Login using your nredlearn google account information.

Summer Assignment Registration Links are below. Select the course that you will be taking NEXT school year 22-23

[Algebra I](#)

[Geometry](#)

Additional Enrichment Options and Support:

- [Tutor.com](#): Connecting with a tutor is quick and easy. Students can access Tutor.com by accessing the [classlink](#), then click the tutor.com icon to access Tutor.com. This service is available to all New Rochelle students 24/7.
- [Khan Academy](#) has launched a series of “Get Ready” summer math courses for many of our course options. You can find and register for them [HERE](#).

We are also making available print resources for review at each grade level and course level to give students a choice of engagement without a digital interface.
