## Portable Planetarium Advanced Training

The East Central Educational Service Center has offered the use of two Digitalis Starlab Planetariums to member schools for many years.

Almost 400 ECESC educators have been trained by Dave Sell, the ECESC's presenter and highly qualified Starlab expert.

During the 2017-2018 school year, the Starlab was set up in 46 schools in 25 member districts.

This Advanced Training is open ONLY to those who have completed the basic "Digitalis" training at the ECESC, who have used the Planetarium in their school or district, and who would like to learn how to get more out of their lesson plans.

Dave Sell will present new resources that can be used immediately when they showcase Starlab in their school. He will share new content that will take your own presentations to the next level!

**Date:** Thursday, November 29, 2018  
**Location:** East Central ESC in Connorsville  
**Audience:** Educators who have completed the ECESC basic Starlab training
